## PREFACE

**Selangit Subdistrict in Figures 2019** is an annual publication written by BPS Musi Rawas Regency. Honestly, this publication has not perfect yet and has not filled the user's hope, especially for the planners yet, but hopefully it can help to equip compilation of development planning in this subdistrict.

This comprehensive publication has been made possible with the assistance and contribution from several governmental institutions and private organizations. To all parties who have been involved in the preparation of this publication, I would like to express my sincerest appreciation and gratitude.

Comments and constructive suggestions for the improvement of this publication are always welcome.

Musi Rawas, September 2019

**PENJELASAN TEKNIS**

1. Badan Pusat Statistik (BPS) telah melakukan pendataan Potensi Desa (Podes) sejak tahun 1980. Sejak saat itu, Podes dilaksanakan secara rutin sebanyak 3 kali dalam kurun waktu sepuluh tahun untuk mendukung kegiatan Sensus Penduduk, Sensus Pertanian, ataupun Sensus Ekonomi. Dengan demikian, fakta penting terkait ketersediaan infrastruktur dan potensi yang dimiliki oleh setiap wilayah dapat dipantau perkembangannya secara berkala dan terus menerus.
2. Sejak tahun 2008, pendataan Podes mengalami perubahan dengan adanya penambahan kuesioner suplemen kecamatan dan Kecamatan di Kabupaten Musi Rawas. Penambahan kuesioner tersebut bertujuan untuk meningkatkan manfaat data Podes bagi para konsumen data dan pemerintah daerah dalam perencanaan pembangunan wilayah.
3. Data Podes merupakan satu-satunya sumber data kewilayahan yang muatannya beragam dan memberi gambaran tentang situasi pembangunan suatu wilayah (regional). Ini berbeda dengan data dari hasil pendekatan rumah tangga yang lebih menekankan pada dimensi

**TECHNICAL NOTES**

1. *BPS-Statistics Indonesia has already recorded village potential (Podes) since 1980. Since then, Podes regularly implemented 3 (three) times within ten years to support the activities of the Population Census, Agriculture Census, or Economic Census. Thus, important facts related to the availability of infrastructure and the potential possessed by each region can be monitored regularly and continually.*
2. *Since 2008, Podes has been changed especially in providing additional information from subdistrict and Sub District in Musi Rawas Regency, using separate questionnaires. The goal of these changes is to provide more benefits for data users and local government in regional development planning.*
3. *Podes data is the only one Source of spatial data consisting of various information and providing a picture of development progress in a region. The Podes data are different from data resulted from household surveys focusing on the dimension of sectoral activities. Both kind of data are*

aktivitas sektoral. Keduanya sama penting dan menjadi kekayaan BPS.

4. **Cakupan Wilayah**

Pencacahan Podes dilakukan secara sensus terhadap seluruh wilayah administrasi pemerintahan terendah setingkat desa (yaitu desa, kelurahan, nagari, Unit Permukiman Transmigrasi (UPT)) yang masih dibina oleh kementerian terkait.

5. **Sungai** adalah aliran air yang besar (biasanya buatan alam).

*important and become the trade mark of BPS on the data richness aspect.*

4. **Podes Coverage**

*Podes enumeration is implemented as a census of the lowest governmental administrative region equivalent to village (i.e. village, sub-district, nagari, and Transmigration Settlement Unit which is still fostered by the relevant ministries).*

5. **The river** is large stream of water (usually made in nature).

## *Population*

**PENJELASAN TEKNIS**

1. Sumber utama data kependudukan adalah sensus penduduk yang dilaksanakan setiap sepuluh tahun sekali. Sensus penduduk telah dilaksanakan sebanyak enam kali sejak Indonesia merdeka, yaitu tahun 1961, 1971, 1980, 1990, 2000, dan 2011.

Di dalam sensus penduduk, pencacahan dilakukan terhadap seluruh penduduk yang berdomisili di wilayah territorial Indonesia termasuk warga negara asing kecuali anggota korps diplomatik negara sahabat beserta keluarganya. Metode pengumpulan data dalam sensus dilakukan dengan wawancara antara petugas sensus dengan responden dan juga melalui e-census. Pencatatan penduduk menggunakan konsep usual residence, yaitu konsep di mana penduduk biasa bertempat tinggal. Bagi penduduk yang bertempat tinggal tetap dicacah di mana mereka biasa tinggal, sedangkan untuk penduduk yang tidak bertempat tinggal tetap dicacah di tempat di mana mereka ditemukan petugas sensus pada malam ‘Hari Sensus’. Termasuk penduduk yang tidak bertempat tinggal tetap adalah tuna wisma, awak kapal berbendera Indonesia, penghuni perahu/rumah apung, masyarakat terpencil/terasing, dan pengungsi. Bagi mereka yang mempunyai tempat

**TECHNICAL NOTES**

1. *The main Source of demographic data is population census, which is conducted every ten years. Population Census has been conducted six times since Indonesia's independence: 1961, 1971, 1980, 1990, 2000, and 2011.*

*The population census enumerates all residents who domicile in the entire territory of Indonesia including foreign citizens except the diplomatic corps members and their families.*

*The method of data collection in a population census involves interviewing respondents and conducting e-census. Enumeration of the population uses the concept of “usual residence”, which is the concept of “places where people usually live”. De jure was applied to the permanent residents, while de facto was applied to non-permanent residents. The permanent residents were enumerated in place where they normally live, the non-permanent residents were enumerated where they were found by the enumerators, on the night of ‘Census Date’. The non permanent residents include homeless people, ship crew, boat people, remote area community, and internally displaced persons. Those*

tinggal tetap dan sedang bepergian ke luar wilayah lebih dari enam bulan, tidak dicacah di tempat tinggalnya, tetapi dicacah di tempat tujuannya.

Untuk tahun yang tidak dilaksanakan sensus penduduk, data kependudukan diperoleh dari hasil proyeksi penduduk. Proyeksi penduduk merupakan suatu perhitungan ilmiah yang didasarkan pada asumsi dari komponen-komponen perubahan penduduk, yaitu kelahiran, kematian, dan migrasi. Proyeksi penduduk Indonesia 2011–2035 menggunakan data dasar penduduk hasil SP2011.

2. **BPS - Penduduk Indonesia** adalah semua orang yang berdomisili di wilayah teritorial Indonesia selama 6 bulan atau lebih dan atau mereka yang berdomisili kurang dari 6 bulan tetapi bertujuan menetap .
3. **Disdukcapil - Penduduk** adalah setiap orang baik warga negara Indonesia maupun Warga Negara Asing yang bertempat tinggal di wilayah di Negara RI dan telah memenuhi ketentuan Peraturan Perundang-undangan yang berlaku.
4. **Laju pertumbuhan penduduk** adalah

*who had permanent residence and had been travelling away from their home for six months or more were not enumerated in their permanent place, but in the place where they were during the census.*

*For the periods where the population census is not conducted, population projection is done to estimate population during those years. The population projection is an estimate based on the demographic components, such as birth, death, and migration. Indonesia's 2011–2035 population projection used the 2011 Population Census as the base population.*

2. **BPS - The population of Indonesia** are all residents of the entire territory of Indonesia who have stayed for six months or longer, and those who intended to stay more than six months even though their length of stay is less than six months.
3. **Disdukcapil - Population** is any person both Indonesian citizens and Foreign Citizens who reside in the territory of the Republic of Indonesia and has complied with the provisions of the applicable Laws and Regulations.
4. **The growth rate of population** is the

angka yang menunjukkan persentase pertambahan penduduk dalam jangka waktu tertentu.

5. **Kepadatan penduduk** adalah rasio Jumlah penduduk per kilometer persegi.
6. **Rasio jenis kelamin** adalah perbandingan antara penduduk laki-laki dan penduduk perempuan pada suatu wilayah dan waktu tertentu. Biasanya dinyatakan dengan Jumlah penduduk laki-laki untuk 100 penduduk perempuan.
7. **Distribusi penduduk** adalah pola persebaran penduduk di suatu wilayah, baik berdasarkan batas-batas geografis maupun berdasarkan batas-batas administrasi pemerintahan.
8. **Komposisi penduduk** adalah pola persebaran penduduk menurut karakteristiknya, contoh: penduduk menurut kelompok umur, penduduk menurut jenis kelamin.
- number that show percentage of population growth within a specified period.
5. **Population density** is ratio of population per square kilometer.
6. **Sex ratio** is the ratio of males population to females population in a given area and time, usually expressed as the number of males for every 100 females.
7. **Population distribution** is the pattern of population distribution in an area, either by geographic boundaries or by government administrative boundaries.
8. **Population composition** is the pattern of population distribution by its characteristics, example: population by age group, population by sex.
