KATA PENGANTAR

Sektor konstruksi merupakan salah satu sektor yang penting dalam perekonomian Indonesia. Untuk mengetahui perkembangan sektor tersebut dari waktu ke waktu, Badan Pusat Statistik (BPS) melakukan Survei Tahunan Perusahaan Konstruksi yang dilakukan secara serentak pada perusahaan konstruksi di Indonesia. Data yang dikumpulkan dalam survei ini mencakup berbagai hal mengenai kegiatan perusahaan konstruksi.

Data yang disajikan dalam publikasi ini adalah hasil Survei Tahunan Perusahaan Konstruksi tahun 2001 yang meliputi karakteristik kegiatan perusahaan konstruksi selama setahun, seperti jumlah dan nilai balas jasa tenaga kerja, pendapatan bruto, pengeluaran, serta beberapa jenis data lainnya yang terkait.

Akhirnya pada kesempatan ini kami mengucapkan terima kasih dan penghargaan kepada semua pihak, khususnya kepada para pengusaha dan pemimpin perusahaan konstruksi yang telah membantu kelancaran pelaksanaan Survei Tahunan Perusahaan Konstruksi tersebut

Jakarta, September 2003
Kepala Badan Pusat Statistik,

FOREWORD

The Construction sector is an important sector of the Indonesian economy. In order to obtain information of this sector, BPS-Statistics Indonesia conducts the Annual Survey of Construction Establishments, which covers construction establishments in Indonesia.

Construction Statistical data presented in this publication are resulted from 2001 Annual Construction Establishment Survey. Data provided in this publication cover activities of construction establishments during a period of one year, such as the number of employees, employee compensation, gross output, intermediate inputs, and a number of other related data.

We would like to express our gratitude to all parties especially executives of construction establishment, who have helped in providing data for this publication.

Jakarta, September 2003

TABEL-TABEL / TABLES :

1. Ringkasan Pendapatan Bruto dan Pengeluaran Konstruksi <i>Summary of Gross Output and Intermediate Input by Construction Establishment</i>	1
2. Pendapatan Bruto Perusahaan Konstruksi Menurut Propinsi <i>Gross Output of Construction Establishments by Province</i>	2
3. Pengeluaran Perusahaan Konstruksi Menurut Propinsi <i>Intermediate Input of Construction Establishments by Province</i>	3
4. Jumlah Perusahaan Konstruksi Menurut Propinsi <i>Number of Construction Establishment by Province</i>	4
5. Jumlah Karyawan Tetap Menurut Propinsi <i>Number of Permanent Employees by Province</i>	5
5.1 Jumlah Karyawan Tetap Laki-Laki Menurut Propinsi <i>Number of Permanent Male Employees by Province</i>	6
5.2 Jumlah Karyawan Tetap Perempuan Menurut Propinsi <i>Number of Permanent Female Employees by Province</i>	7
5.3 Jumlah Karyawan Tetap Berpendidikan Sekolah Dasar <i>Number of Permanent Employees Elementary School Graduated</i>	8
5.4 Jumlah Karyawan Tetap Berpendidikan Sekolah Lanjutan Tingkat Pertama <i>Number of Permanent Employees Junior High School Graduated</i>	9
5.5 Jumlah Karyawan Tetap Berpendidikan Sekolah Lanjutan Tingkat Atas <i>Number of Permanent Employees Senior High School Graduated</i>	10
5.6 Jumlah Karyawan Tetap Berpendidikan Akademi/Diploma III <i>Number of Permanent Employees Three Years Diploma Graduated</i>	11
5.7 Jumlah Karyawan Tetap Berpendidikan Universitas <i>Number of Permanent Employees University Graduated</i>	12

6.	Jumlah Hari-Orang Pekerja Lapangan Harian Lepas Menurut Propinsi <i>Number of Man-days of Part Time Field Workers by Province</i>	13
6.1	Jumlah Hari-Orang Pekerja Lapangan Harian Lepas untuk Gedung Tempat Tinggal Menurut Propinsi <i>Number of Man-days of Part Time Field Workers for Residential by Province</i>	14
6.2	Jumlah Hari-Orang Pekerja Lapangan Harian Lepas untuk Gedung Bukan Tempat Tinggal Menurut Propinsi <i>Number of Man-days of Part Time Field Workers for Non Residential by Province</i>	15
6.3	Jumlah Hari-Orang Pekerja Lapangan Harian Lepas untuk Pembuatan/Perbaikan Jalan/Jembatan Menurut Propinsi <i>Number of Man-days of Part Time Field Workers for Construction/Improvement of Road/Bridge by Province</i>	16
6.4	Jumlah Hari-Orang Pekerja Lapangan Harian Lepas untuk Pengairan/Drainase Menurut Propinsi <i>Number of Man-days of Part Time Field Workers for Irrigation/Drainage by Province</i>	17
6.5	Jumlah Hari-Orang Pekerja Lapangan Harian Lepas untuk Pekerjaan Lainnya Menurut Propinsi <i>Number of Man-days of Part Time Field Workers for Others Construction by Province</i>	18
7.	Balas Jasa Karyawan Menurut Propinsi <i>Compensation of Employees by Province</i>	19
7.1	Balas Jasa Karyawan Dalam Bentuk Gaji, Upah Lembur, Bonus dan Hadiah <i>Compensation of Employees in Wages and Fringes</i>	20
7.2	Balas Jasa Karyawan Dalam Bentuk Tunjangan Pensiun, Sosial, Asuransi <i>Compensation of Employees in Pension, Social and Insurance</i>	21
8.	Upah yang dibayarkan kepada Pekerja Lapangan Harian Lepas Menurut Propinsi <i>Wages Paid to Part-time Field Worker by Province</i>	22
9.	Nilai Pengeluaran Bahan Bangunan Menurut Propinsi <i>Value of Construction Material by Province</i>	23
9.1	Nilai Pengeluaran Bahan Bangunan untuk Bangunan Tempat Tinggal <i>Value of Construction Material for Residential</i>	24
9.2	Nilai Pengeluaran Bahan Bangunan untuk Bangunan Bukan Tempat Tinggal <i>Value of Construction Material for Non Residential</i>	25
9.3	Nilai Pengeluaran Bahan Bangunan untuk Pemasangan Listrik <i>Value of Construction Material for Electrical Installation</i>	26
9.4	Nilai Pengeluaran Bahan Bangunan untuk Pemasangan Pipa Air Minum <i>Value of Construction Material Water Supply Pipe Installation</i>	27
9.5	Nilai Pengeluaran Bahan Bangunan untuk Pemasangan Sanitasi <i>Value of Construction Material for Sanitation</i>	28

9.6	Nilai Pengeluaran Bahan Bangunan untuk Pondasi <i>Value of Construction Material for Foundation</i>	29
9.7	Nilai Pengeluaran Bahan untuk Sound System, AC, Lift, Dekorasi <i>Value of Construction Material for Sound System, AC, Decoration</i>	30
9.8	Nilai Pengeluaran Bahan Bangunan untuk Jaringan Air Minum yang <i>Value of Construction Material for Water Supply Network</i>	31
9.9	Nilai Pengeluaran Bahan Bangunan untuk Jaringan Pipa Gas <i>Value of Construction Material Gas Pipe Network</i>	32
9.10	Nilai Pengeluaran Bahan Bangunan untuk Jaringan Listrik <i>Value of Construction Material for Electricity Network</i>	33
9.11	Nilai Pengeluaran Bahan Bangunan untuk Pembuatan/Perbaikan Jalan dan Jembatan <i>Value of Construction Material for Construction/Improvement of Road and Bridge</i>	34
9.12	Nilai Pengeluaran Bahan Bangunan untuk Pengairan/Drainase <i>Value of Construction Material for Irrigation/Drainage</i>	35
9.13	Nilai Pengeluaran Bahan Bangunan untuk Pembangkit Tenaga Listrik <i>Value of Construction Material for Electricity Power Plant</i>	36
9.14	Nilai Pengeluaran Bahan Bangunan untuk Pembuatan/Perbaikan Lapangan Terbang, Pelabuhan, Terminal Bus <i>Value of Construction Material for Construction/Improvement of Airport Harbor, Bus Station</i>	37
9.15	Nilai Pengeluaran Bahan Bangunan untuk Konstruksi Lainnya <i>Value of Construction Material for Others Construction</i>	38
10.1	Banyaknya Pemakaian Bensin Menurut Propinsi <i>Quantity of Benzine Consumed by Province</i>	39
10.2	Banyaknya Pemakaian Solar Menurut Propinsi <i>Quantity of Solar Consumed by Province</i>	40
10.3	Banyaknya Pemakaian Minyak Diesel Menurut Propinsi <i>Quantity of Diesel Oil Consumed by Province</i>	41
10.4	Banyaknya Pemakaian Tenaga Listrik Menurut Propinsi <i>Quantity of Electricity Consumed by Province</i>	42
11.	Biaya Pemakaian Bahan Bakar dan Tenaga Listrik Menurut Propinsi <i>Expenditure of Fuel and Electricity Consumed by Province</i>	43
12.	Biaya Bahan dan Jasa Lainnya Menurut Propinsi <i>Expenditure of Others Materials and Services by Province</i>	44
13.	Nilai Konstruksi yang Diselesaikan Menurut Jenis Pekerjaan <i>Value of Construction Completed by Type of Construction</i>	45

14.	Nilai Konstruksi yang Diselesaikan Menurut Propinsi <i>Value of Construction Completed by Province</i>	46
14.1	Nilai Gedung Tempat Tinggal yang Diselesaikan Menurut Propinsi <i>Value of Residential Completed by Province</i>	47
14.2	Nilai Gedung Bukan Tempat Tinggal yang Diselesaikan Menurut Propinsi <i>Value of Non Residential Completed by Province</i>	48
14.3	Nilai Konstruksi Pemasangan Listrik yang Diselesaikan Menurut Propinsi <i>Construction Value of Electrical Installation Completed by Province</i>	49
14.4	Nilai Konstruksi Pemasangan Pipa Air Minum yang Diselesaikan Menurut Propinsi <i>Construction Value of Water Supply Pipe Installation Completed by Province</i>	50
14.5	Nilai Konstruksi Sanitasi yang Diselesaikan Menurut Propinsi <i>Construction Value of Sanitation Completed by Province</i>	51
14.6	Nilai Konstruksi Pondasi yang Diselesaikan Menurut Propinsi <i>Construction Value of Foundation Works Completed by Province</i>	52
14.7	Nilai Konstruksi Sound System, AC, Lift yang Diselesaikan Menurut Propinsi <i>Construction Value of Sound System, AC, Lift, Decoration Completed by Province</i>	53
14.8	Nilai Konstruksi Instalasi Jaringan Air Minum yang Diselesaikan Menurut Propinsi <i>Construction Value of Water Supply Network Completed by Province</i>	54
14.9	Nilai Konstruksi Jaringan Pipa Gas yang Diselesaikan Menurut Propinsi <i>Construction Value of Gas Pipe Network Completed by Province</i>	55
14.10	Nilai Konstruksi Jaringan Listrik yang Diselesaikan Menurut Propinsi <i>Construction Value of Electrical Network Completed by Province</i>	56
14.11	Nilai Pembuatan/Perbaikan Jalan/Jembatan yang Diselesaikan Menurut Propinsi <i>Value of Construction/Improvement of Road/Bridge Completed by Province</i>	57
14.12	Nilai Konstruksi Pengairan/Drainase yang Diselesaikan Menurut Propinsi <i>Construction Value of Irrigation/Drainage Works Completed by Province</i>	58
14.13	Nilai Konstruksi Pembangkit Tenaga Listrik yang Diselesaikan Menurut Propinsi <i>Construction Value of Electricity Power Plant Completed by Province</i>	59
14.14	Nilai Konstruksi Pembuatan/Perbaikan Lapangan Terbang, Pelabuhan Dan Terminal Bus yang Diselesaikan Menurut Propinsi <i>Construction Value of Construction/Improvement of Airport, Harbor, Bus Station Completed by Province</i>	60
14.15	Nilai Konstruksi Pekerjaan Lainnya yang Diselesaikan Menurut Propinsi <i>Value of Others Completed Construction by Province</i>	61
15.1	Nilai Konstruksi yang Diselesaikan dari Sumber Dana APBN <i>Value of Completed Construction Financed by Central Government Budget</i>	62

15.2	Nilai Konstruksi yang Diselesaikan dari Sumber Dana APBD <i>Value of Completed Construction Financed by Local Government Budget</i>	63
15.3	Nilai Konstruksi yang Diselesaikan dari Dana Luar Negeri <i>Value of Completed Construction Financed by Foreign Loan</i>	64
15.4	Nilai Konstruksi yang Diselesaikan dari Sumber Dana BUMN <i>Value of Completed Construction Financed by State Enterprises</i>	65
15.5	Nilai Konstruksi yang Diselesaikan dari Sumber Dana Lainnya <i>Value of Completed Construction Financed by Other Sources of Fund</i>	66
16.	Nilai Konstruksi yang Diselesaikan oleh Subkontraktor Menurut Propinsi <i>Construction Value Completed by Subcontractor by Province</i>	67
17.	Pendapatan dari Kegiatan Lain Menurut Propinsi <i>Income from Other Activities by Province</i>	68

PENJELASAN

EXPLANATION

<http://www.bps.go.id>

PENJELASAN

EXPLANATION

I. PENDAHULUAN

Data Statistik Konstruksi yang disajikan dalam publikasi ini adalah hasil Survei Tahunan Perusahaan Konstruksi tahun 2001.

Selain itu, survei triwulanan dengan sampel yang lebih kecil disajikan dalam bentuk Indikator Konstruksi Triwulanan.

II. RUANG LINGKUP

Survei Tahunan Perusahaan Konstruksi mencakup perusahaan konstruksi nasional yang beroperasi di Indonesia.

Maksud dan tujuan Survei Konstruksi adalah untuk memperoleh data tentang struktur dan ciri-ciri sektor konstruksi di Indonesia, antara lain: jenis konstruksi, banyaknya tenaga kerja, pembentukan modal, besar nilai konstruksi, dan lain sebagainya.

III. KONSEP DAN DEFINISI

3.1 Konstruksi

Konstruksi adalah suatu kegiatan yang hasil akhirnya berupa bangunan/ konstruksi yang menyatu dengan lahan tempat kedudukannya, baik digunakan sebagai tempat tinggal atau sarana kegiatan lainnya. Hasil kegiatan antara lain: gedung, jalan, jembatan, rel dan jembatan kereta api, terowongan, bangunan air dan drainase, bangunan sanitasi, landasan pesawat terbang, dermaga, bangunan pembangkit listrik, transmisi, distribusi dan bangunan jaringan komunikasi. Kegiatan konstruksi meliputi perencanaan, persiapan, pembuatan, pembongkaran dan perbaikan bangunan.

3.2 Kontraktor Umum

Kontraktor umum adalah perusahaan yang bergerak di bidang pembangunan, perubahan/perombakan, perbaikan dan pembongkaran gedung-gedung, jalan raya, jalan-jalan dalam kota, gorong-gorong, saluran bawah tanah, pipa air minum, jalan kereta api, dermaga, terowongan kereta api bawah

I. INTRODUCTION

Construction Statistical data presented in this publication are resulted from 2001 Annual Construction Establishment Survey.

In addition, the quarterly survey with smaller sample size is presented in the Quarterly Construction Indicator.

II. THE COVERAGE

The coverage of Annual Construction Survey includes national construction establishments of Indonesian.

The main purpose of Construction Survey is to obtain data on structure and characteristics of a construction sector in Indonesia. Type of characteristics covered in this publication are kind of construction, number of employees, capital formation, value of construction etc.

III. CONCEPTS AND DEFINITION

3.1 Construction

Construction is an activity to build building/construction that are unseparately with their location. The construction can be used for residence or other purposes. The results of construction activities, such as building construction, road, bridge, railway and rail bridge, tunnel subway, viaduct and drainage, sanitary construction, airport building, airfield construction, dams, electricity generating, building, distribution, transmission and communication network construction. Construction activities include planning, preparation, execution, demolition, and repairing buildings and other constructions.

3.2 General Contractors

General contractors are establishment engaged in the field of construction, alteration/reconstruction, repairing and demolition of buildings, highways, streets, culverts, sewers, waterlines, railway roadbeds, railroads, harbours, tunnels, subways, elevated highways, bridges, viaducts, dams, drainage projects,

tanah, jalan bebas hambatan, jembatan, sanitasi, irigasi, tanggul (pengendali banjir), pembangkit listrik tenaga air, saluran gas, pelabuhan udara, kincir air, lapangan atletik, lapangan golf, kolam renang, lapangan tenis, tempat parkir, sistem komunikasi, jalur telepon dan telegraph dan sebagainya. Juga termasuk perusahaan yang melakukan konstruksi di laut seperti pengerukan lumpur, pemindahan batu karang di bawah air, pemancang tiang, pengolahan tanah, konstruksi pelabuhan dan terusan. Selain itu perusahaan yang bergerak di sektor pertambangan seperti: persiapan dan pembangunan daerah pertambangan, pengeboran minyak dan sumber gas alam.

3.3 Kontraktor Khusus

Kontraktor khusus adalah perusahaan yang khusus mengerjakan sebagian dari satu pekerjaan proyek pembangunan dan atas dasar sub-kontrak dari kontraktor lain, atau mengerjakan sesuatu pekerjaan dari pemilik ("bouwheer"/investor). Jenis-jenis konstruksi tersebut seperti: pemasangan alat pendingin ruangan (AC), alat pemanas ruangan (~~heater~~), batu, ubin, batu marmer, dekorasi, pintu, jendela, lantai, atap, instalasi listrik, fasilitas sanitasi, pondasi, pembongkaran, perbaikan dan pemeliharaan rumah/gedung dsb.

3.4 Perusahaan

Perusahaan adalah suatu badan yang melakukan kegiatan ekonomi, bertujuan menghasilkan barang/jasa, terletak di suatu bangunan fisik pada lokasi tertentu, dan mempunyai catatan administrasi tersendiri mengenai produksi dan struktur biaya, serta ada seorang atau lebih yang bertanggung jawab atas resiko usaha. Badan usaha perusahaan konstruksi dapat berbentuk PT, CV, Firma, PT(Per-sero), Perusahaan Umum atau Perusahaan Jawatan

3.5 Jenis Pekerjaan

3.5.1 Penyiapan Lahan

Meliputi usaha pembongkaran dan penghancuran gedung atau bangunan lain serta pembersihannya, termasuk peledakan, tes pengeboran, pengurukan dan perataan, pemindahan tanah, pembuatan saluran untuk mengeringkan lahan. Tidak termasuk di dalamnya penyiapan lahan untuk usaha pertambangan, seperti untuk pertambangan batu bara dan minyak/gas.

sanitation projects, aqueducts, irrigation projects, hydro electric plants, hydro electric projects, gas mains, pipe lines as well as other types of heavy construction: marine construction such as digging, under water rock removal, pile driving, land draining, and reclamation, construction of harbor and waterways, water wheels, airports, athletic fields, golf courts, swimming pools, tennis courts, parking areas, communication systems such as telephone and telegraph lines. The work related with mining activities such as preparation and construction of mining area, drilling for oil and natural gas resources.

3.3 Special Contractors

Special contractors were the firms engaged in special construction representing a part of a construction project on sub-contract from the main contractor or on a direct contract with the owner. This type of contractors were exclusively undertaking installations of air conditioner or heater, setting stones/bricks, tiles, marbles, decorations, doors, windows, floor, decorating, electric installations, sanitary facilities, water resource drilling, foundation laying, repairment and maintenance of houses, etc.

3.4 Firm/Establishment

Establishment is an economic activity unit to provide goods or service in a physical building, possessing cost structure and production record keeping about it's production and cost structure, and has one or more entrepreneur who responsible to the risk. Type of legality of construction establishment could be in non-profit organization, cooperative association, partnership, government's company (local and national), and private company.

3.5 Kind of Construction Works

3.5.1 Site Preparation

This classification of works includes demolition or wrecking of building and other structures, clearing of building sites from demolished structure. Blasting, test drilling, landfill, leveling, earth moving, land drainage and others land preparation. Preparation of oil and gas fields such as coal mining, oil and gas mining are excluded from this classification.

3.5.2 Konstruksi Umum

Konstruksi umum meliputi konstruksi sipil gedung dan konstruksi selain gedung.

a. **Konstruksi Sipil Khusus Gedung** meliputi usaha pembangunan gedung yang dipakai untuk bangunan hunian biasa, gedung pendidikan, peribadatan, balai pengobatan, perkantoran, penginapan, pusat perdagangan, kawasan industri/pabrik, gedung terminal/stasiun, gedung olah raga, gedung kesenian/hiburan, bangunan perdagangan, hanggar dsb.

b. **Konstruksi sipil selain gedung** meliputi:

1) **Konstruksi jalan, jembatan dan landasan pesawat terbang:** adalah usaha pembangunan, pemeliharaan, dan perbaikan jalan, jembatan, dan landasan pesawat terbang, termasuk kegiatan pembangunan penunjang landasan dan perlengkapannya, seperti pagar/tembok penahan, trotoir jalan, marka jalan, rambu-rambu

2) **Konstruksi Jalan dan jembatan kereta api:** meliputi usaha pembangunan, pemeliharaan dan perbaikan rel, jembatan dan jalan layang kereta api.

3) **Bangunan terowongan:** meliputi usaha pembangunan, pemeliharaan dan perbaikan terowongan bawah tanah, pegunungan/pebukitan dan bawah permukaan air.

4) **Konstruksi pengairan:** meliputi usaha pembangunan, pemeliharaan dan perbaikan bendungan, waduk, jaringan irigasi, tanggul pengendali banjir, turap dsb.

5) **Konstruksi sistem penyaluran dan penampungan air bersih, air limbah dan drainase:** meliputi usaha pembangunan, pemeliharaan dan perbaikan seperti bangunan penyadap dan transmisi air baku, bangunan pengolah air baku, bangunan menara air dan reservoir air, jaringan transmisi dan distribusi serta tangki air bersih, saluran air limbah kota, jaringan drainase pemukiman, bangunan pompa, basin retensi.

6) **Konstruksi Pengolahan, penyaluran dan penampungan minyak dan gas:** meliputi usaha pembangunan, pemeliharaan dan perbaikan bangunan pengolahan minyak dan gas, termasuk bangunan dan transmisi penyadap minyak, bangunan pengolahan reservoir minyak/gas, jaringan penyaluran dan tangki minyak gas.

3.5.2 General Construction

General constructions include special civil construction for building and non building construction.

a. **Civil Construction special for Building,** include all activities to build, maintain and rehabilitate of dwelling, educational building, worship building, health center, office building, hotel, shopping center, industrial center/factory, bus station, sport center, art and cultural center, warehousing, airplane garage, and others.

b. **Civil construction non building, consist of:**

1) **Street, Bridge and airfield Construction:** are activities to build, maintain and rehabilitate of street, bridge, and airfield. Also include all airfield facilities such as a barrier wall, side street for walker, traffic mark on street.

2) **Railway and Rail bridge Construction:** include all activities to build, maintain and rehabilitate railway, rail bridge and rail fly over.

3) **Tunnel Construction:** include all activities to build, maintain, and rehabilitate underground tunnel, mountains tunnel and underwater tunnel.

4) **Irrigation system construction:** include all activities to build, maintain and rehabilitate dam, reservoir, irrigation network, viaduct, etc.

5) **Water sewerage system:** include all activities to build, maintain and rehabilitate all kind of taper construction and water transmission, prime water processing, prime water tower, and water reservoir, transmission and distribution network, and pure water tank, waste water duct in town, housing drainage, pump construction, retention basin.

6) **Oil and gas processing, distributing, collecting and saving:** include all activities to build, maintain and rehabilitate of oil and gas processing construction, also include oil and gas tapping, transmission, refinery construction, oil and gas reservoir processing construction, and oil and gas tank.

7) **Pengerukan:** meliputi pengerukan sungai, rawa, danau dan alur pelayaran, kolam dan kanal pelabuhan baik bersifat pekerjaan ringan, sedang, maupun berat.

8) **Konstruksi Dermaga:** meliputi usaha pembangunan, pemeliharaan dan perbaikan dermaga, sarana pelabuhan, penahan gelombang, dan sejenisnya.

9) **Konstruksi Sipil Lainnya:** meliputi usaha pembangunan, pemeliharaan dan perbaikan bangunan sipil lainnya yang belum termasuk dalam jenis bangunan sipil di atas, seperti lapangan olahraga, sarana pemukiman, tempat parkir, dan sejenisnya.

3.5.3 Elektrik dan Telekomunikasi

Kegiatan konstruksi elektrik dan telekomunikasi meliputi:

1) **Konstruksi Elektrikal:** meliputi usaha pembangunan, pemeliharaan dan perbaikan pembangkit tenaga listrik, transmisi tegangan tinggi dan distribusi, pembangunan gardu induk, pemasangan tiang listrik, konstruksi listrik penunjang angkutan kereta api, meteorologi dan geofisika.

2) **Konstruksi Telekomunikasi sarana bantu navigasi laut dan rambu sungai:** meliputi pembangunan, pemeliharaan dan perbaikan menara, pelampung suar, lampu sinyal pelabuhan, dan peralatan suar lainnya.

3) **Telekomunikasi navigasi udara dan peralatan penyelamatan:** meliputi usaha pembangunan, pemeliharaan dan perbaikan pemancar/penerima radar, konstruksi antena, dan sejenisnya.

4) **Sinyal dan telekomunikasi kereta api:** meliputi usaha pembangunan, pemeliharaan dan perbaikan konstruksi sinyal lalu lintas dan telekomunikasi kereta api.

5) **Sentral telekomunikasi:** meliputi usaha pembangunan, pemeliharaan dan perbaikan sentral telepon/telegraf, konstruksi menara pemancar/penerima radar microwave, bangunan bumi kecil/ stasiun satelit.

6) **Konstruksi elektrik dan telekomunikasi lainnya:** meliputi usaha pembangunan, pemeliharaan

7) **Dredging:** include activities to dredge river, swamp, pool, water trip traffic, and harbor canal with small, medium or big scale working.

8) **Harbor Construction:** include all activities to build, maintain and rehabilitate of harbor, harbor facilities, sea barrier, etc.

9) **Other Civil Construction:** include all activities to build, maintain and rehabilitate other civil construction that not yet mentioned in this class description above such as sport field, dwelling environment (out of building), parking area, etc

3.5.3 Electrical and Telecommunication

Electrical and telecommunication activities include:

1) **Electrical Construction:** include activities to build, maintain and rehabilitate all kind of electric power working, high voltage transmission and distribution, warehouse of center electric system, electric, pile installation, electric construction of train transportation, meteorology and geophysic.

2) **Telecommunication construction, sea navigation and river traffic light:** include all activities to build, maintain and rehabilitate all kind of tower, rubber canoe, harbour and other equipment of signal light.

3) **Search and Rescue Equipment and Navigation Telecommunication:** include all activities to build, maintain and rehabilitate all kind of radar transmission, antenna construction, etc.

4) **Train and Signal Telecommunication:** include all activities to build, maintain and rehabilitate all kind of signal construction and train telecommunication.

5) **Telecommunication Center:** Include all activities to build, maintain and rehabilitate all kind of central telephone and telegraph, radar transmission tower construction, microwave, small station satellite on earth.

6) **Other Electrical and Telecommunication Construction:** include activities to build, maintain and

dan perbaikan konstruksi elektrikal dan telekomunikasi lainnya.

3.5.4 Konstruksi Khusus

Kegiatan konstruksi khusus terdiri dari :

1) **Pemasangan pondasi dan pilar:** meliputi kegiatan khusus pemasangan berbagai pondasi dan pilar gedung, jalan/ jembatan, Konstruksi pengairan/ dermaga.

2) **Pembuatan/pengeboran sumur air:** meliputi kegiatan khusus pembuatan/ pengeboran untuk mendapatkan air tanah, baik skala kecil, skala sedang atau skala besar dan tekanan tinggi.

3) **Pemasangan steiger:** meliputi kegiatan khusus pemasangan steiger pada bangunan gedung, jalan/jembatan, Konstruksi pengairan/ dermaga dsj.

4) **Pembuatan atap:** meliputi kegiatan khusus pemasangan atap gedung baik tempat tinggal maupun non tempat tinggal.

5) **Pemasangan bangunan/konstruksi prefab dan pemasangan kerangka baja:** meliputi kegiatan khusus pemasangan prefab dan kerangka baja.

6) **Konstruksi khusus lainnya:** meliputi usaha konstruksi khusus lainnya yang belum disebutkan sebelumnya

7) **Instalasi Gedung:** adalah kegiatan pemasangan, pemeliharaan dan perbaikan instalasi yang berada di dalam gedung atau bangunan. Kegiatan tersebut meliputi instalasi air bersih, air limbah dan saluran drainase; instalasi listrik, termasuk di dalamnya Instalasi air conditioning; instalasi gas; instalasi elektronika, seperti pemasangan sistem alarm, sirkuit televisi, sound sistem; dan mekanikal, seperti lift, tangga berjalan, ban berjalan dan pintu otomatis.

8) **Instalasi bangunan sipil:** adalah kegiatan pemasangan, pemeliharaan dan perbaikan instalasi bangunan sipil. Kegiatan tersebut terdiri dari pemasangan dan pemeliharaan instalasi listrik jalan raya, jalan kereta api dan lapangan udara; pemasangan dan pemeliharaan instalasi navigasi laut dan sungai seperti instalasi menara suar, lampu suar, pelampung suar, lampu pelabuhan dan sejenisnya; pemasangan dan pemeliharaan instalasi meteorologi dan geofisika skala kecil, sedang atau besar.

rehabilitate all kind of other electrical and other telecommunication.

3.5.4 Special Construction

Special construction activities contain:

1) **Foundation and Pile Construction:** include activities to install any kind of foundation and pile for building, street and bridge, harbor and irrigation system.

2) **Artesian well work:** include construction activities to get artesian in small scale working, medium scale working or big scale working and high pressure.

3) **Steiger Installation:** include activities to install Steiger on building, street and bridge, harbor and irrigation system construction.

4) **Roof Installation:** include all activities to install roof on dwelling and non residential building.

5) **Prefab Construction and Steel frame work Installation:** include all activities to install prefab construction and steel frame work.

6) **Other Special Construction:** include all activities installing other construction that not mentioned above.

7) **Building Installation:** include all activities to install, maintain, and rehabilitate building installation. The activities include pure and waste water installation and drainage networks; electrical Installation include Air conditioning installation; gas installation; electronic Installation, include electronic system, such as alarm system installation, television circuit, sound system; and mechanical installation such as elevator, escalator, conveyer, and automatic door.

8) **Civil Construction Installation:** is activities to install, maintain and services all civil construction installation. This classification consist of street electrical installation, include installation on street, railway, and airport; river and sea navigation installation such as signal light tower, signal light equipments, rubber canoe signal light, harbor signal; meteorological and geophysical installation in small, medium or big scale; air navigation installation, such as air communication navigation construction, signal

pemasangan dan pemeliharaan instalasi navigasi udara, seperti navigasi Konstruksi komunikasi udara, pemancar dan penerima sinyal, vasi, lampu pendekatan, DVOR, ILS, NDB; pemasangan dan pemeliharaan instalasi sinyal dan telekomunikasi kereta api; pemasangan dan pemeliharaan instalasi sinyal dan perambuan jalan raya; pemasangan dan pemeliharaan instalasi telekomunikasi pada sentral telepon/ telegraf, stasiun pemancar radar, micro wave, stasiun bumi kecil/stasiun satelit dan sejenisnya termasuk kegiatan pemasangan transmisi dan jaringan telekomunikasi; dan instalasi sipil lainnya.

9) **Penyelesaian Konstruksi Sipil** adalah pekerjaan tahap akhir konstruksi sipil, seperti: pemasangan kaca dan aluminium; pengerjaan lantai, dinding, peralatan saniter dan plafon gedung; pengecatan; pengerjaan interior dan dekorasi dalam penyelesaian akhir; pengerjaan eksterior dan pertamanan pada bangunan gedung atau konstruksi sipil lainnya; dan kegiatan penyelesaian akhir lainnya pada gedung/konstruksi.

3.5.5 Penyewaan Alat Konstruksi adalah penyewaan alat konstruksi seperti crane, lorries, molen, buldozer, concrete mixer, mesin pancang disertai dengan operatornya. Tidak termasuk penyewaan peralatan konstruksi yang tidak disertai dengan operatornya.

3.6 Pekerja/Karyawan

1) **Pekerja** adalah semua orang yang pada saat pencacahan bekerja di perusahaan, meliputi pekerja dibayar dan pekerja tidak dibayar.

2) **Pekerja dibayar** adalah semua orang yang bekerja di perusahaan/usaha dengan mendapat upah/gaji dan tunjangan-tunjangan lainnya baik berupa uang maupun barang, meliputi pekerja tetap dan pekerja harian lepas **Pekerja harian lepas** adalah pekerja yang tidak terikat secara tetap dengan perusahaan, dimana mereka hanya bekerja selama pekerjaan/proyek ada dan bila pekerjaan/proyek telah selesai maka secara otomatis mereka tidak mempunyai hubungan kerja lagi dengan perusahaan.

3) **Pekerja tidak dibayar**, meliputi pekerja pemilik dan pekerja keluarga yang ikut aktif pada perusahaan tetapi tidak mendapat upah/gaji. Pekerja keluarga yang bekerja kurang dari 1/3 jam kerja biasa, tidak dihitung sebagai pekerja.

4) **Pekerja teknik** adalah semua pekerja yang langsung terlibat dalam pembuatan bangunan atau

transmission, vation, slide approach, runway light, DVOR, ILS, NDB; signal installation and train telecommunication; signal installation and traffic light on street; telecommunication installation on central telephone and telegraph, radar transmission station, micro wave, small satellite station, also include telecommunication network and transmission installation; and other civil construction installation that not yet mentioned above.

9) **Civil Construction Finishing** is activities to finish up civil construction, such as glass and aluminium installation; floor works, wall works, ceiling and sanitary equipments work; building painting or other construction work decoration and interior design; gardens and exterior work; and any kind that not yet mentioned above.

3.5.5 Renting of Construction Equipment is activities to rent any equipment with operators such as lorry crane, molen, tractors, concrete mixer, drilling machine. Any kind equipments that rented without operators are excluded from this classification.

3.6 Worker

1) **Worker** is any person at the time of enumeration is working in the establishment including paid and unpaid worker.

2) **Paid worker** is any workers that receive wage and salary and any other allowance both in cash and in kind. These workers include the permanent employee and part time field worker. **Part time field workers** are any workers who don't have permanent relationship to the establishment, They work during the projects and don't have any relationship any more if the project over. It's mean that if the project had finished, they automatically quit from the company.

3) **Unpaid Worker** is any workers that works without any compensations including the owner and his family. Family workers who works less than one third of normal working time is left out.

4) **Technical Worker** is any worker who works directly in the construction field or has a direct relation

yang berhubungan dengannya, misal: pengawas, mandor, operator peralatan, juru ukur, arsitek, juru gambar, dan perencana.

5) **Pekerja non teknik** adalah semua pekerja selain pekerja teknik, seperti karyawan tata usaha, keuangan, resepsionis, sekretaris, juru ketik, dsb.

3.7 Nilai Konstruksi

Nilai konstruksi adalah nilai pekerjaan yang telah diselesaikan oleh pihak pemborong berdasarkan surat perjanjian atau surat perintah kerja antara pemilik dengan kontraktor.

IV. METODE PENGUMPULAN DATA

Pengumpulan data Survei Tahunan Perusahaan Konstruksi dilakukan secara langsung oleh petugas Badan Pusat Statistik perwakilan daerah dan atau Koordinator Statistik Kecamatan (KCK).

V. METODE PENGOLAHAN DATA

Pengolahan data dilakukan secara manual dan komputerisasi. Pada tahapan manual dilakukan cek awal terhadap seluruh isian kuesioner terutama mengenai identitas seperti nama propinsi, kabupaten/kotamadya, nama perusahaan dan alamat apakah sudah sesuai dengan direktori yang ada. Selayaknya untuk meneliti kebenaran dan kewajaran dilakukan penyuntingan dan penyandian terhadap isian kuesioner. Kemudian pada tahap komputerisasi dilakukan data entri, validasi dan tabulasi

VI. METODE ESTIMASI

Angka sementara tahun 2002 diperoleh dari estimasi berdasarkan Survei Konstruksi Triwulanan. Metode estimasi dilakukan dengan cara menggunakan angka pertumbuhan (*growth*) tahun 2002 dibandingkan dengan tahun 2001.

with a construction activity, such as supervisor, equipment operator, measure specialist, drawer, construction planner.

5) **Non technical Worker** is any workers except technical worker, such as administration worker, accountant, receptionist, secretary, typist, etc.

3.7 Construction Value

Construction value is value of work completed by contractor based on the letter of contract or letter of working order between the owner and the contractor.

IV. DATA COLLECTION METHOD

Data collection for Annual Construction Survey Indonesian are enumerated by BPS's staff and/or enumerator.

V. DATA PROCESSING METHOD

Data are processed by manual and computerization system. First process was manually checking for all items in the questionnaire. Especially the identity of province, regency / municipality, establishment's name and address to be compared by the directory. The data are then edited and validated for further computer process.

VI. ESTIMATION METHOD

Preliminary figures for 2002 are estimated from Quarterly Construction Survey. This estimation is calculated by using growth of 2002 compare with 2001.

ULASAN SINGKAT *REVIEW*

1. Pendahuluan

Secara umum kegiatan pada sektor konstruksi menggambarkan peranan yang signifikan dalam kegiatan perekonomian suatu negara, berkaitan dengan permintaan terhadap bahan baku, jasa dan penyerapan tenaga kerja. Sektor tersebut peka terhadap pergerakan aktivitas dunia usaha secara umum, pergerakan sektor konstruksi (paling tidak dalam sistem ekonomi pasar yang dominan) cenderung dapat menjelaskan dan mendahului pergerakan ekonomi secara keseluruhan. Dengan kata lain, secara umum puncaknya relatif lebih tinggi, dan palungnya lebih rendah, serta puncak dan palung tersebut cenderung mendahului pergerakan kegiatan ekonomi lainnya dalam suatu siklus bisnis secara umum. Meningkatnya kegiatan pada sektor konstruksi sebenarnya merupakan cerminan langsung perpindahan dari konsumsi ke investasi (pembentukan barang modal), dan sebaliknya.

2. Pendapatan Bruto dan Biaya Antara

Pada tahun 2001 pendapatan bruto sektor konstruksi mulai mengalami kenaikan. Jika pada tahun 2000 pendapatan bruto sektor konstruksi senilai 19,7 triliun rupiah, pada tahun 2001 nilainya menjadi 21,2 triliun rupiah atau naik sebesar 7,6%, dan pada tahun 2002 naik sebesar 17% menjadi 24,8 triliun rupiah.

1. Introduction

The construction industry generally represents a significant share of the total economic activity of a country, with corresponding demands for materials, services and labour inputs. It is sensitive to the movements in the general level of business activity, the movements in construction (at least in a predominantly market economy) tending to both amplify and lead the movements in the economy as a whole. In other words, its peaks are generally relatively higher, and its troughs lower, and both peaks and troughs tend to precede their counterparts in the general business cycle. These swings in levels of construction activity correspond to - indeed, are direct reflection of - shift from consumption to savings (capital formation) and vice versa in the economy as a whole.

2. Gross output and Intermediate Input

Value of gross output on construction sector began to increase in 2001. The value has been increased from 19.7 trillion rupiahs in 2000 became 21.2 trillion in 2001 or increase about 7.6%, and in 2002 about 17% to become 24.8 trillion rupiahs.

Tabel/Table: A					
Pendapatan Bruto dan Input Antara <i>Gross Output and Intermediate Input</i>					
(Milyar rupiah / billion rupiahs)					
	1998 **	1999	2000	2001	2002*
1. Pendapatan Bruto <i>Gross Output</i>	20.949,0	16.056,5	19.698,4	21.171,6	24.778,2
2. Input antara <i>Intermediate Input</i>	12.345,3	7.889,7	9.942,2	11.377,1	13.140,3

Catatan/Note: * angka sementara/preliminary figures
** tanpa Timor Timur/excluding East Timor

Sejalan dengan kenaikan nilai pendapatan bruto, kenaikan biaya antara pada tahun 2001 juga relatif cukup besar. Jika pada tahun 2000 biaya antaranya senilai 9,9 triliun rupiah, pada tahun 2001 menjadi 11,4 triliun rupiah atau naik sebesar 15,2%, dan pada tahun 2002 terjadi kenaikan sebesar 14,9% menjadi 13,1 triliun rupiah.

3. Nilai Konstruksi

Nilai konstruksi merupakan komponen utama dalam struktur output perusahaan konstruksi. Total nilai konstruksi yang diselesaikan pada tahun 2001 mengalami kenaikan dibandingkan tahun 2000. Jika pada tahun 2000 nilai konstruksi mencapai sebesar 17 triliun rupiah, pada tahun 2001 menjadi 19,5 triliun rupiah atau naik 14,7%, dan tahun 2002 naik 15,4% menjadi 22,5 triliun rupiah.

Seperti tahun-tahun sebelumnya, proyek konstruksi masih terkonsentrasi di pulau Jawa-Bali. Tabel B menunjukkan pada tahun 2001 dan 2002 sekitar 50,8% dan 48,9% dari total nilai konstruksi di pulau Jawa-Bali, tetapi cenderung mengalami penurunan setiap tahunnya. Struktur prosentase nilai konstruksi antar kelompok pulau cenderung mengalami peningkatan, kecuali pulau Jawa-Bali.

Along with the increasing in gross output value, intermediates input on construction activities also increased. The value was increase from 9.9 trillion rupiahs in 2000 to 11.4 trillion rupiahs in 2001 or increase about 15.2%, and increased to 14.9% in 2002 to become 13.1 trillion rupiahs.

3. Construction Value

Construction value is the main component of output structure. The Construction value in 2000 was about 17 trillion rupiahs, then went up to 19.5 trillion rupiahs in 2001 or increased about 14.7%, and increased to 15.4% in 2002 to become 22.5 trillion rupiahs.

Like the other years before, construction works have still been concentrating in Java-Bali. Table B shows that in 2001 and 2002 about 50.8% and 48.9% in these islands, but has a tendency to decrease for year to year. The percentage of all construction value among island groups has a tendency to increase, except Java-Bali.

Catatan/Note: * angka sementara/preliminary figures

4. Penyerapan Tenaga Kerja

Sektor konstruksi menempati posisi strategis dalam penyerapan tenaga kerja. Pada Tabel C tampak jumlah karyawan tetap yang diserap pada tahun 1998 mencapai 192 ribu orang dan pada tahun 2002 naik menjadi 321 ribu orang atau naik rata-rata 13,4% per tahun.

Di samping tenaga kerja tetap, juga tidak kalah penting adalah penyerapan tenaga kerja harian lepas, seperti tukang batu, tukang kayu, tukang gali, tukang cat, dan sebagainya. Jika pada tahun 1998 jumlah tenaga kerja harian lepas yang diserap berjumlah 173 juta orang-hari, pada tahun-tahun berikutnya berfluktuasi hingga mencapai 197 juta orang-hari pada tahun 2002.

Sisi lain yang cukup menarik dalam penyerapan tenaga kerja sektor konstruksi adalah peranan tenaga kerja tetap perempuan. Pada tahun 1998 komposisi mereka adalah sebesar 14,4% dari total tenaga kerja, tetapi pada tahun 2002 naik menjadi 16,3% dari total tenaga kerja tetap.

4. Man Power Absorption

A construction sector has strategic position in term of man power absorption. According to Table C the number of fixed workers employed by construction firms in 1998 was 192 thousand workers and increased becoming 321 thousand workers in 2002 or increased at average 13.4% a year.

Beside the fixed workers' absorption, the firms also have an important role in the part-time field workers' absorption, such as carpenters in wood and stone specialist, diggers, painters, etc. According to Table C, in 1998 number of part-time field workers absorbed reached 173 million man days and fluctuated to 197 million man days in 2002.

The other side that makes the absorption of man power interesting was the role of female fixed workers in construction business. In year 1998 composition of female fixed workers was 14.4% of all, then increase to 16.3% in 2002.

Tabel/Table: C					
Jumlah Tenaga Kerja Perusahaan Konstruksi Number of Worker of Construction Establishment					
Kategori Tenaga Kerja Worker Category	1998 **	1999	2000	2001	2002 *

(i) Laki-laki Male	164.611 (85,6%)	131.075 (85,3%)	183.378 (84,3%)	218.826 (84,2%)	268.826 (83,7%)
(ii) Perempuan Female	27.686 (14,4%)	22.531 (14,7%)	34.092 (15,7%)	41.133 (15,8%)	52.224 (16,3%)
2. Pekerja harian lepas Part time field worker (000 orang-hari / man-days)	173.608	146.176	168.526	170.227	196.645

Catatan/Note: * angka sementara/preliminary figures

** tanpa Timor Timur/excluding East Timor

5. Kualitas Sumber Daya Manusia

Sejalan dengan kemajuan teknologi dan ilmu pengetahuan, perusahaan konstruksi secara berangsur-angsur meningkatkan kualitas sumber daya manusianya. Tabel D, menyajikan jumlah karyawan tetap menurut pendidikan yang ditamatkan.

Pada tahun 1998 jumlah tenaga kerja tetap berpendidikan sarjana sebesar 33 ribu orang maka pada tahun 2002 naik menjadi sekitar 49 ribu orang dari seluruh tenaga kerja tetap pada tahun tersebut. Ini berarti pekerja tetap berpendidikan sarjana mengalami kenaikan sekitar 9,7% per tahun.

Sedang jumlah tenaga kerja tetap berpendidikan sekolah dasar sebesar 7 ribu orang pada tahun 1998 naik menjadi sekitar 11 ribu orang pada tahun 2002 dari seluruh tenaga kerja tetap pada tahun tersebut. Ini berarti pekerja tetap berpendidikan sekolah dasar mengalami kenaikan sekitar 11,4% per tahun.

5. Man Power Quality

Science and technology cause the quality of human resources of construction establishment develops gradually. Table D, shown number of fixed worker by education graduated.

In 1998 number of fixed workers graduated from university level about 33 thousand workers then in 2002 the number increased to become about 49 thousand workers. This means compare to the situation in 1998, the role played by college graduate employee increased to about 9.7% a year.

Meanwhile number of fixed workers graduated from elementary school level about 7 thousand workers in 1998 the number increased to become about 11 thousand workers in 2002. This means compare to the situation in 1998, the role played by elementary school graduate employee increased to about 11.4% a year.

Tabel/Table: D

KATA PENGANTAR

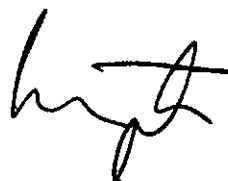

Untuk kesekian kalinya Biro Pusat Statistik (BPS) menerbitkan publikasi statistik lingkungan hidup Indonesia. Walaupun masih jauh dari sempurna, ternyata permintaan atas publikasi ini cukup banyak.

Namun demikian seperti disadari oleh berbagai pihak, statistik lingkungan hidup memang baru mulai mendapat perhatian. Sehingga tidak seperti statistik sosial-ekonomi atau demografi, statistik lingkungan hidup masih baru berkembang tidak saja di Indonesia akan tetapi juga di berbagai negara di dunia. Saat ini, BPS bersama-sama dengan Kantor Menteri Negara Lingkungan Hidup dan Badan Pengendalian Dampak Lingkungan (Bapedal) sedang menyusun kerangka kerja pengembangan statistik lingkungan hidup yang sesuai dengan kondisi Indonesia berdasar pada Undang-Undang Nomor 4 tahun 1982 tentang Ketentuan Pokok-Pokok Pengelolaan Lingkungan Hidup. Mudah-mudahan publikasi ini nantinya akan dapat bermanfaat secara maksimal baik untuk kebutuhan nasional maupun internasional.

Kepada semua pihak yang telah membantu tersusunnya publikasi ini diucapkan terimakasih. Mudah-mudahan publikasi ini dapat membantu sidang pembaca di dalam memenuhi kebutuhan data lingkungan hidup. Segala kritik dan saran demi perbaikan terbitan publikasi ini selanjutnya akan diterima dengan senang hati.

Jakarta, 1 Maret 1997

Kepala Biro Pusat Statistik,

Sugito Suwito, MA
NIP. 340000452
