PREFACE

The Paser Regency in Figures” is one of the BPS of Paser Regency. This publication is aimed at providing general information on development of Paser Regency. With the 2013 edition, a number of improvement has been made such as the inclusion of new data and information and simplification of some table’s lay out found in the previous publications. However, to maintain time series comparability, most of these table’s format were retained and updated with more recent data. Where the current data are not yet available from the usual sources, BPS substitutes them with estimated data derived from related documents or from its own time series data.

This publication has been made possible, thanks to the assistance and contributions of various government institutions and private organizations. To all those involved in the preparation of this book, I would like to express my high appreciation and gratitude.

Comments and suggestions to improve the contents of this book are always welcome.

PASAR

Pada umumnya kondisi pasar yang ada di Kecamatan dan Desa tidak beroperasi setiap hari (hanya hari-hari tertentu) namun keberadaan pasar tersebut sangat berperan dalam menggerakkan roda perekonomian.

Tahun 2012, jumlah pasar desa yang ada di Kabupaten Paser ada sebanyak 65 unit yang tersebar di 10 kecamatan. Dilihat dari kondisi bangunannya, 1 termasuk kategori permanen dan sisanya dalam kategori sederhana dan semi permanen.

MARKETS

The markets in subdistricts and villages do not open everyday (open only in certain day), but the markets' existence influence the economy so much.

In 2012, number of village markets in Paser regency are 65 units which spread in 10 subdistricts. One of them are permanent bulding markets, and the rest of them categorized as simple and semipermanent bulding markets.

LOGISTIK

Beras merupakan bahan makanan pokok, oleh sebab itu kondisi stok/ ketersediaannya harus dapat dikendalikan karena dalam kondisi langka dapat mengakibatkan instabilitas harga yang berpengaruh terhadap harga bahan pokok lainnya. Kondisi sebaliknya (melimpah) dapat mengakibatkan penurunan harga yang dapat merugikan produsen (petani).

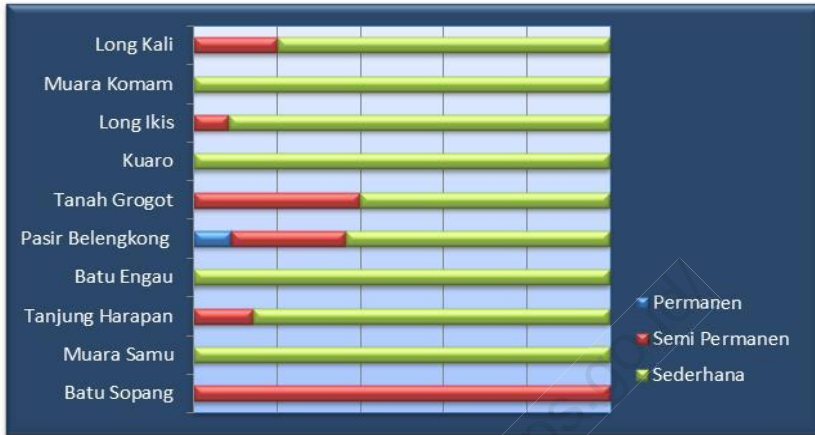

Jumlah beras yang disalurkan seksi logistik Kabupaten Paser sepanjang tahun 2011 sebanyak 6.276.360 Kg dan pada tahun 2012 menjadi 6.789.305 Kg yang mana termasuk di dalamnya beras untuk keluarga miskin.

LOGISTICS

Rice is the main food product in Paser regency, that's why the stock and availability must be controlled. When the rice is rare to find, it will cause the instability in price of rice, which will cause the rising of other main products prices.

The rice distributed by logistics depot during 2011 were 6.276.360 KGs and increase to be 6.789.305 KGs with rice for the lack economy families (RASKIN) are included.
