KEPENDUDUKAN

POPULATION

PENJELASAN TEKNIS

1. Salah satu sumber data kependudukan adalah sensus penduduk yang dilaksanakan setiap sepuluh tahun sekali. Sensus penduduk telah dilaksanakan sebanyak tujuh kali sejak Indonesia merdeka, yaitu tahun 1961, 1971, 1980, 1990, 2000, 2010, dan 2020. Keenam sensus penduduk sebelumnya dilaksanakan dengan menggunakan metode tradisional, yaitu mencatat setiap penduduk dari rumah ke rumah. Pertama kalinya dalam sejarah sensus penduduk di Indonesia, Sensus Penduduk 2020 (SP2020) menggunakan metode kombinasi yaitu dengan memanfaatkan data Administrasi Kependudukan (Admuduk) dari Direktorat Jenderal Kependudukan dan Pencatatan Sipil (Ditjen Dukcapil) Kementerian Dalam Negeri (Kemendagri) sebagai data dasar pelaksanaan SP2020. Hal ini dirancang dan dilaksanakan sebagai upaya untuk mewujudkan "SATU DATA KEPENDUDUKAN INDONESIA".

Cakupan penduduk pada SP2020 adalah seluruh penduduk yang tinggal di wilayah teritorial Indonesia, mencakup Warga Negara Indonesia (WNI) dan Warga Negara Asing (WNA) yang telah menetap atau

TECHNICAL NOTES

1. *One of the source of demographic data is population census, which is conducted every ten years. Population Census has been conducted seven times since Indonesia's independence: 1961, 1971, 1980, 1990, 2000, 2010 and 2020. The previous six population censuses were carried out using the traditional method, canvassing each person door-to-door. For the first time in the history of the population census in Indonesia, the 2020 Population Census (SP2020) used a combined method, that is utilizing Population Administration data managed by the Directorate General of Population and Civil Registration of the Ministry of Home Affairs as the basic data for the population census. This is designed and implemented as an effort to realize "ONE INDONESIAN POPULATION DATA".*

The target for population coverage in Population Census 2020 is all residents who live in Indonesia's territory, including Indonesian citizens (WNI) and foreign citizens (WNA) who have stayed or plan to stay in Indonesian territory for

berencana menetap di wilayah Indonesia selama minimal satu tahun. WNI yang dicakup juga termasuk mereka yang berada di luar negeri, yaitu Anggota Korps Diplomatik Republik Indonesia beserta keluarganya di luar negeri dan Anggota TNI/ POLRI beserta keluarganya yang sedang melakukan misi perdamaian di luar negeri.

Pengumpulan data dalam SP2020 dilakukan dengan berbagai moda yaitu Sensus Penduduk Online, Drop Off - Pick Up (DOPU) Kuesioner, dan wawancara. Adanya pandemi *Coronavirus Disease* (COVID-19) yang dihadapi dunia sejak awal tahun 2020 mendorong banyak kantor statistik nasional (*National Statistics Office* – NSO) untuk melakukan penyesuaian tata kelola penyelenggaraan Sensus Penduduk, termasuk juga BPS. Pendataan penduduk semula direncanakan dengan wawancara dan membagi wilayah menjadi dua zona dengan mempertimbangkan ketersediaan akses internet, yaitu zona yang menggunakan kuesioner kertas (*Paper and Pencil Interviewing*, PAPI) dan zona yang menggunakan elektronik (*Computer Assisted Personal Interviewing*, CAPI). Dengan adanya tata kelola baru, pendataan penduduk dibagi

at least one year. The Indonesian citizens who are covered also include those who are abroad, namely members of the Diplomatic Corps of the Republic of Indonesia and their families abroad and members of the TNI / POLRI and their families who are carrying out Peacekeeping Missions abroad.

Data collection in SP2020 is carried out in various modes, namely Online Population Census, Drop Off - Pick Up (DOPU) Questionnaires, and interviews. The existence of the Coronavirus Disease (COVID-19) pandemic facing the world since the beginning of 2020 has prompted many national statistical offices (NSO) to make adjustments to the governance of the implementation of the Population Census, including BPS - Statistics Indonesia. Population data collection is originally planned by interview and divided the area into two zones taking into account the availability of internet access, namely the zone that uses paper questionnaires (Paper and Pencil Interviewing, PAPI) and the zone that uses electronics (Computer Assisted Personal Interviewing, CAPI). With the adjusted business processes, population data collection is divided into three zones, namely Zone 1 DOPU, Zone 2 Non-DOPU, and Zone 3 Interview.

menjadi tiga zona, yaitu Zona 1 DOPU, Zona 2 NonDOPU, dan Zona 3 Wawancara. Dalam publikasi ini, data yang disajikan merupakan hasil SP2010 (Mei) dan hasil SP2020 (September).

In this publication, the data presented are the SP2010 results (May) and the SP2020 results (September).

2. Penduduk Kabupaten Pasaman adalah semua orang yang berdomisili di wilayah teritorial Kabupaten Pasaman, mencakup Warga Negara Indonesia (WNI) dan Warga Negara Asing (WNA) yang telah menetap selama satu tahun atau lebih atau berencana menetap di wilayah Indonesia selama minimal satu tahun. Pada sensus sebelumnya referensi waktu dalam konsep kependudukan adalah enam bulan. Perubahan ini didasari oleh UU No. 24 Tahun 2013 tentang Perubahan atas UU No. 23 Tahun 2006 tentang Administrasi Kependudukan pada Pasal 15.
 3. Kepadatan penduduk adalah ukuran persebaran penduduk yang menunjukkan jumlah penduduk untuk setiap kilometer persegi luas wilayah.
 4. Rasio jenis kelamin adalah perbandingan antara jumlah penduduk laki-laki dan jumlah penduduk perempuan pada suatu daerah dan waktu tertentu, yang biasanya dinyatakan dalam banyaknya penduduk laki-laki per 100 perempuan.
2. *The population of Pasaman Regency are all people who live in Pasaman's territory, including Indonesian citizens and foreign citizens who have lived for one year or more or plan to stay in Indonesian territory for at least one year. In the previous census the time reference in the population concept was six months. This change is based on Law no. 24 of 2013 concerning Amendments to Law no. 23 of 2006 concerning Population Administration in Article 15.*
 3. *Population density is a measure of the distribution of the population which shows the total population for each square kilometer of area.*
 4. *Sex ratio is the ratio between total male population and total female population in a certain area and at a certain time, which is usually stated in the number of male residents per 100 female*
