## PENJELASAN UMUM SENSUS PERTANIAN 2023 GENERAL EXPLANATION OF THE 2023 CENSUS OF AGRICULTURE

## Latar Belakang

Sektor pertanian memiliki potensi untuk berkontribusi signifikan terhadap ekonomi nasional. Fakta bahwa masih terjadi penyerapan tenaga kerja yang tinggi di sektor pertanian, serta sumbangan devisa yang cukup besar dari sektor agribisnis yang berkembang pesat dan penyediaan bahan baku untuk industri hilir, menunjukkan ketahanan sektor pertanian dalam menghadapi pandemi Covid-19. Mengingat situasi ini, penyediaan data sektor pertanian yang akurat dan tepat waktu sangatlah penting karena dapat membantu pemerintah dan pemangku kepentingan dalam merencanakan dan mengembangkan kebijakan baik untuk kepentingan domestik maupun pembangunan nasional, sehingga dapat digunakan sebagai referensi.

Data statistik dasar sektor pertanian yang komprehensif diperoleh melalui pelaksanaan Sensus Pertanian. Sesuai dengan ketentuan Undang-Undang Nomor 16 tahun 1997, tugas utama dan tanggung jawab untuk menyelenggarakan Sensus Pertanian diberikan kepada Badan Pusat Statistik (BPS).

Sensus Pertanian 2023 (ST2023) diinisiasi untuk mengakomodasi variabel yang diperlukan guna menyajikan data pertanian yang sangat dinamis. Ini bertujuan untuk memenuhi kebutuhan data di tingkat nasional dan internasional, serta dirancang agar hasilnya sesuai dengan standar internasional, mengacu pada program *Food and Agricultural Organization* (FAO) yang dikenal dengan *World Programme for the Census of Agriculture* (WCA) 2020. Oleh karena itu, ST2023 diharapkan dapat menyajikan data yang dapat dibandingkan secara internasional.

## Background

*The agricultural sector has the potential to contribute significantly to the national economy. The fact that there is still a high level of labor absorption in the agricultural sector, along with substantial foreign exchange contributions from the rapidly growing agribusiness sector and the provision of raw materials for downstream industries, demonstrates the resilience of the agricultural sector facing the Covid-19 pandemic. Given this situation, provision of accurate and timely data on agricultural sector is crucial, as it can assist the government and stakeholders in planning and developing policies for both domestic interests and national development, serving as a valuable reference.*

*Comprehensive basic statistical data on the agricultural sector is obtained through the implementation of the Census of Agriculture. In accordance with the provisions of Law Number 16 of 1997, the main task and responsibility for conducting the Census of Agriculture are entrusted to the BPS-Statistics Indonesia.*

*The 2023 Census of Agriculture (ST2023) is initiated to accommodate the necessary variables to present highly dynamic agricultural data. It aims to meet data needs at both national and international levels, and it is designed to produce results that align with international standards, referring to the Food and Agricultural Organization (FAO) program known as the World Programme for the Census of Agriculture (WCA) 2020. Therefore, it is anticipated that ST2023 will present data that can be compared internationally.*

## Tujuan ST2023

Sesuai rekomendasi FAO dalam publikasi “World Programme for the Census of Agriculture 2020”, maka tujuan dari Sensus Pertanian Tahun 2023 adalah:

1. Menyediakan data struktur pertanian sampai unit-unit administrasi terkecil;
2. Menyediakan data yang dapat digunakan sebagai tolok ukur statistik pertanian saat ini;
3. Menyediakan kerangka sampel untuk survei pertanian lanjutan.

Beberapa *output* dari hasil ST2023 yaitu:

1. Tersedianya sistem pengumpulan data pertanian yang terintegrasi dan berkelanjutan dengan Sensus Pertanian sebagai aransemen utama dan Survei Pertanian Terintegrasi (SITASI) sebagai data pelengkap tahunan diantara dua sensus;
2. Tersedianya data Statistik Pertanian baik dalam bentuk tabel dan spasial;
3. Tersedianya data pertanian yang komprehensif dan memenuhi data-data kewilayahan;
4. Terpenuhinya data pertanian untuk agenda global misalnya Indikator SDGs di sektor pertanian dan isu strategis yang ada di RPJMN;
5. Pemanfaatan *cost effective data collection tools and methodology* yang direkomendasikan FAO seperti penggunaan *Computer-Assisted Personal Interview (CAPI)* dan *Computer Aided Web Interviewing (CAWI)*;
6. Pemanfaatan data administrasi.

## Cakupan Wilayah dan Kegiatan

Unit usaha pertanian yang dicakup dalam ST2023 mencakup Usaha Pertanian Perorangan (UTP), Perusahaan Pertanian Berbadan Hukum (UPB), dan Usaha Pertanian Lainnya (UTL).

## Objectives of ST2023

*In accordance with the FAO recommendations outlined in the publication “World Programme for the Census of Agriculture 2020,” the objectives of the Census of Agriculture in 2023 are as follows:*

1. *Provide agricultural structure data down to the smallest administrative units.*
2. *Supply data that can be used as a benchmark for current agricultural statistics.*
3. *Provide sample frames for subsequent agricultural surveys.*

*Several outputs from the results of ST2023 include:*

1. *The availability of an integrated and sustainable agricultural data collection system, with the Census of Agriculture as the main arrangement and Agricultural Integrated Survey (AGRIS/SITASI) as annual supplementary data between two censuses.*
2. *Availability of Agricultural Statistics data in both tabular and spatial forms.*
3. *Availability of comprehensive agricultural data that meets regional data requirements.*
4. *Fulfillment of agricultural data for global agendas, such as SDGs indicators in the agricultural sector and strategic issues in the National Medium-Term Development Plan (RPJMN).*
5. *Utilization of cost-effective data collection tools and methodologies recommended by FAO, such as the use of Computer-Assisted Personal Interview (CAPI) and Computer Aided Web Interviewing (CAWI).*
6. *Utilization of administrative data.*

## Coverage of Areas and Activities

*The agricultural holding encompassed in ST2023 include Individual Agricultural Holding (UTP), Agricultural Corporation (UPB), and Other Agricultural Holding (UTL).*

Dalam pelaksanaan ST2023, petugas akan bekerja di satuan wilayah kerja yang ditetapkan dalam Satuan Lingkungan Setempat (SLS). SLS yang digunakan adalah SLS hasil Sensus Penduduk 2020 yang mencakup muatan keluarga dari SP2020, termasuk wilayah non-SLS yang sudah terisi muatan. Untuk memastikan efektivitas dan efisiensi dalam mekanisme sensus, perlu dilakukan pembagian wilayah SLS sesuai dengan muatan yang ada di setiap SLS. Penetapan wilayah konsentrasi pertanian dalam SLS didasarkan pada data perkiraan muatan dari pembaruan Wilayah Kerja Statistik (Wilkerstat) tahun 2022 yang mencakup informasi jumlah keluarga/KK dan jumlah keluarga tani/KK tani di suatu wilayah SLS/Non-SLS.

Pengaturan wilayah untuk pencacahan unit usaha pertanian perorangan (UTP) terdiri dari pembagian wilayah CAPI dan *Paper Assisted Personal Interviewing* (PAPI). Pendataan pada ibu kota provinsi di seluruh Indonesia dan seluruh wilayah di DKI Jakarta menggunakan metode CAPI, sementara wilayah lainnya menggunakan metode PAPI.

## Metodologi

Pelaksanaan pencacahan dalam ST2023 menerapkan dua metode pengumpulan data, yaitu metode *door to door* dan metode *snowball*. Metode *door to door* merupakan cara pengumpulan data dengan mengunjungi setiap unit observasi dalam setiap area sampel enumerasi. Sementara itu, metode *snowball* adalah cara pengumpulan data dengan mengunjungi hanya unit observasi yang diidentifikasi sebagai unit observasi yang memenuhi syarat.

Dalam pencacahan lengkap pada unit usaha pertanian perorangan (UTP), cakupan Satuan Lingkungan Setempat (SLS) melibatkan SLS yang memiliki muatan KK/KK tani dan sudah diklasifikasikan ke dalam wilayah konsentrasi dan non-konsentrasi pertanian. Pencacahan UTP di wilayah SLS

During the implementation of ST2023, fieldworkers will operate in designated work areas known as Local Administrative Units (SLS). The SLS utilized is derived from the 2020 Population Census and includes the family size from SP2020, encompassing both SLS and non-SLS areas that have already been filled with the data. To ensure the effectiveness and efficiency of the census mechanism, it is necessary to divide the SLS areas according to the size in each SLS. The determination of agricultural concentration areas within the SLS is based on estimated size data from the 2022 update of Enumeration Area (Wilkerstat), including information on the number of families/households (KK) and the number of farmer families (KK tani) in a specific SLS/Non-SLS area.

The arrangement of areas for the enumeration of individual agricultural holding (UTP) consists of dividing the areas into CAPI and Paper Assisted Personal Interviewing (PAPI) categories. Data collection in the provincial capitals throughout Indonesia and the entire DKI Jakarta region employ the CAPI method, while other regions utilize the PAPI method.

## Methodology

The implementation of enumeration in ST2023 employs two data collection methods: *door-to-door* and *snowball* methods. The *door-to-door* method involves visiting each observation unit in each enumeration sample area. Meanwhile, the *snowball* method collects data by visiting only observation units identified as eligible observation units.

In the complete enumeration of individual agricultural holding (UTP), the coverage of Local Administrative Units (SLS) involves SLS with family/household (KK/KK tani) loads and has been classified into concentration and non-concentration areas of agriculture. Enumeration of UTP in agricultural concentration areas of SLS

konsentrasi pertanian dilakukan dengan metode *door to door*, sedangkan di wilayah SLS non-konsentrasi, pencacahan UTP dilakukan dengan metode *snowball*.

Pendekatan pengumpulan data untuk Usaha Pertanian Perorangan (UTP) disesuaikan dengan ketersediaan jaringan internet di setiap kabupaten/kota di tiap provinsi. Pada ibukota provinsi di seluruh Indonesia dan seluruh wilayah DKI Jakarta, pencacahan UTP dilakukan dengan menggunakan moda CAPI, sementara di wilayah kabupaten/kota lainnya menggunakan PAPI sebagai moda pencacahan.

Kegiatan ST2023 meliputi tujuh subsektor pertanian, yaitu:

1. Subsektor tanaman pangan,
2. Subsektor tanaman hortikultura,
3. Subsektor tanaman perkebunan,
4. Subsektor peternakan,
5. Subsektor perikanan,
6. Subsektor kehutanan, dan
7. Subsektor jasa pertanian.

Sedangkan kegiatan pertanian yang dicakup meliputi:

1. Budi daya tanaman, yaitu: padi, palawija, hortikultura (sayuran, buah-buahan, tanaman hias, dan tanaman obat), perkebunan, kehutanan (antara lain: kayu, getah, rotan, dll).
2. Budi daya Ternak/Unggas.
3. Budi daya ikan dan penangkapan ikan.
4. Penangkaran Tumbuhan dan Satwa Liar, Perburuan dan penangkapan satwa liar, dan pemungutan hasil hutan.
5. Jasa pertanian.

## Konsep dan Definisi

Dalam pelaksanaan Sensus Pertanian 2023, konsep dan definisi berperan memberikan kerangka kerja yang jelas dan konsisten untuk pengumpulan data, interpretasi, dan analisis hasil Sensus Pertanian 2023. Beberapa konsep dan definisi yang umum digunakan pada pelaksanaan Sensus Pertanian 2023 sebagai berikut:

*The data collection approach for Individual Agricultural Holding (UTP) is adapted based on the availability of internet networks in each regency/municipality in each province. In the provincial capitals throughout Indonesia and the entire DKI Jakarta region, UTP enumeration is conducted using the CAPI method, while in other regency/municipality areas, PAPI is used as the enumeration method.*
