BAB I PENDAHULUAN

1.1. Latar Belakang

Otonomi daerah, yang telah diimplementasikan sejak tahun 2001, menuntut ketersediaan informasi sampai wilayah kecil yang lengkap, akurat, dan terkini untuk membuat formulasi kebijakan pembangunan yang tepat. Sementara itu, perencanaan dan program pembangunan akan dapat diimplementasikan secara tepat bila didukung oleh ketersediaan data statistik wilayah kecil yang relevan. Dengan demikian, kebijakan bersifat spesifik lokal yang sesuai dengan kondisi masyarakat setempat dapat dilaksanakan oleh pemerintah di level daerah tersebut misalnya kabupaten/kota, kecamatan, atau desa.

Pendataan Potensi Desa (Podes) yang selalu dilaksanakan sebagai bagian dari sebuah sensus dan diselesaikan setahun menjelang kegiatan sensus seperti: sensus penduduk, sensus pertanian, atau sensus ekonomi, telah dilaksanakan sejak tahun 1980. Dengan demikian, pendataan podes dilaksanakan selama 3 (tiga) kali dalam kurun waktu 10 (sepuluh) tahun.

Pendataan Podes 2008 pada bulan April – Mei 2008, berbeda dengan pendataan-pendataan podes sebelumnya. Beberapa informasi kependudukan dan perumahan dikumpulkan untuk menyediakan informasi pendukung yang mungkin dibutuhkan bagi kegiatan sensus penduduk tahun 2010 nanti, dikemas dalam modul kependudukan.

Informasi yang disediakan dari Podes dapat digunakan untuk memantau dan mengevaluasi kegiatan pembangunan di tingkat desa. Podes juga menyediakan informasi spasial untuk melengkapi informasi kewilayahan, penduduk dan karakteristiknya seperti yang telah tersedia pada data sosial dan ekonomi.

Podes 2008 telah mengalami beberapa penyempurnaan untuk menambah manfaat bagi konsumen data khususnya pemerintah daerah dan perencana pembangunan daerah. Penyempurnaan yang dimaksud adalah kuesioner suplemen: Podes08-Kec untuk level kecamatan dan Podes08-Kab/Kota untuk level kabupaten/kota. Penambahan kuesioner tersebut dimaksudkan untuk meningkatkan kelengkapan

CHAPTER I INTRODUCTION

1.1. Background

The regional autonomy, which has been implemented since 2001, implies the availability of comprehensive, accurate and up to date small area information to formulate precise development policies. Specifically, development planning and programs can be implemented precisely based on the availability of relevant small area statistical data. Hence, local specific policies, that are appropriate for local communities, can be employed by the local level governments i.e. regencies, districts, or villages.

Village potential census (Podes), which is always conducted as a part of a census and should be completed a year preceding censuses i.e. population census, agricultural census or economic census, has been accomplished since 1980. Consequently, they have been done three times within 10 years.

Podes 2008, which was carried out April – May 2008, is different to the previous ones. Some information such as demography and housing were collected to provide necessary supporting information for the next 2010 population census, which are collected in module questionnare.

The information provided by Podes can be used to monitor and evaluate development progresses in the villages. Podes also provides spatial information to complement the information on region, population and their characteristics those are already available in the social and economic datasets.

Podes 2008 has been improved to augment the usefulness of the data for customers, particularly local governments and regional development planner. The main improvements are: introducing both district (Podes08-Kec) and regency/city (Podes08-Kab/Kota) supplement questionnaires. It is expected that the additional questionnaires will improve the completeness and accuracy of

dan akurasi data. Beberapa pertanyaan yang tidak tersedia pada level desa misalnya ketersediaan lapangan terbang perintis komersial, terminal bis, stasiun kereta api, dsb termasuk informasi yang langka ditemui di level desa ditanyakan pada kuesioner suplemen tersebut.

1.2. Tujuan

Publikasi ini dimaksudkan untuk menyediakan informasi agregat terkait potensi desa menurut provinsi. Publikasi ini diharapkan mampu mengarahkan penelitian lebih jauh terkait pembangunan daerah di Indonesia. Oleh karena itu, tujuan yang hendak dicapai dalam pendataan Podes adalah:

- Menyediakan informasi potensi desa dan kinerja program pembangunan di tingkat desa/kelurahan misalnya: aspek sosial dan ekonomi, sarana dan prasarana, serta potensi desa lainnya,
- Menyediakan data spasial untuk perencanaan, pemantauan, dan evaluasi program-program pembangunan pada tingkat nasional dan tingkat regional,
- Melengkapi penyusunan kerangka sampel untuk kegiatan statistik lebih lanjut,
- Menyediakan data dasar bagi kompilasi dan pembaruan informasi statistik pada level desa seperti monografi desa dan peta tematik,
- Menyediakan data pokok dan data dasar bagi penyusunan statistik wilayah kecil.

the data. Furthermore, some information, which is not available at village level i.e. the availability of commercial pioneer airport, bus terminals, train station, etc, included in the supplement questionnaires.

1.2. Objectives

This publication is intended to provide aggregate information related to the village potential at provincial level. It is strongly expected that it would lead to the further study regarding the regional development in Indonesia. Moreover, the objectives of the Podes are:

- Providing village potential information, and performance of development programs at village level, i.e. social and economic aspects, infrastructure, and other villages potential,*
- Providing spatial data for planning, monitoring, and evaluating the development programs at national and regional level,*
- Completing the construction of sampling frame for the further statistical activities,*
- Providing basic data for compiling and up-dating statistical information at village level such as village's monograph and thematic map,*
- Providing a core and basic data for the compilation of small area statistics.*

BAB II METODOLOGI

2.1. Cakupan Wilayah

Pengumpulan data Podes 2008 dilakukan pada semua desa/kelurahan serta wilayah administrasi lain setingkat desa misalnya: nagari, Unit Pemukiman Transmigrasi (UPT) dan Permukiman Masyarakat Tertinggal (PMT) yang masih dibina oleh departemen terkait di seluruh Indonesia. Desa/kelurahan/nagari dan lainnya tersebut telah definitif dan operasional, artinya wilayah ini telah terbentuk, ada aparat, dan ada penduduk.

Referensi waktu bagi data merujuk pada waktu pencacahan yaitu Mei 2008. Namun demikian banyak pula data yang mengacu selama 1 atau 3 tahun sebelum pencacahan.

2.2. Jenis Data

Secara umum, data yang dikumpulkan dikelompokkan menjadi: (a) sumber daya manusia, (b) sumber daya alam, (c) sarana dan prasarana, (d) fasilitas umum, (e) fasilitas sosial dan ekonomi. Keterangan yang dikumpulkan dalam Podes 2008 dikelompokkan menjadi:

- A. Podes08-Kor
 - (1) Keterangan Umum
 - (2) Kependudukan dan Ketenagakerjaan
 - (3) Perumahan dan Lingkungan Hidup
 - (4) Bencana Alam
 - (5) Pendidikan dan Kesehatan

CHAPTER II METHODOLOGY

2.1. Coverage

Village Potential Census involved all villages and all other administrative areas equivalent to village such as Nagari, Transmigration Settlement Unit, and Settlement for Indigenous People managed by respective department all over Indonesia. The villages have been definitive and operational. It means, that the villages have been existed, have apparatus, and there are people.

Time reference of the data is referred to the period of data collection, i.e. May 2008. However many of data is referred to 1 or 3 years before the period of data collection.

2.2. Types of Data

In general, the collected data are categorized into: (a) human resources, (b) natural resources, (c) infrastructure, (d) public facilities, and (e) social and economic facilities. Information collected in the village potential census 2008 are grouped into:

- A. Podes08-Kor
 - (1) General Information
 - (2) Demography and Employment
 - (3) Settlement and Environment
 - (4) Natural Disaster
 - (5) Education and Health
 - (6) Socio and Culture
 - (7) Entertainment and Sports
 - (8) Transportation, Communication, and Information
 - (9) Economy
 - (10) Security
 - (11) Village Autonomy and Poverty Alleviation Programs
 - (12) Information of Village Officer

- B. Podes08-Modul
(1) Kependudukan
(2) Perumahan

- B.Podes08-Modul*
(1) Demography
(2) Settlement

2.3. Metode Pengumpulan Data

Data dikumpulkan melalui wawancara langsung dengan kepala desa/aparat desa. Wawancara juga dilakukan dengan petugas pada instansi terkait bagi beberapa data tertentu. Dengan demikian, klarifikasi lebih jauh dapat dilakukan dan waktu untuk pengumpulan data menjadi lebih singkat.

Petugas pendata Podes 2008 mengisi dua rangkap kuesioner yaitu satu rangkap (warna biru) ditinggal untuk arsip desa/kelurahan dan satu rangkap (warna merah) dikirim ke BPS Kabupaten/Kota untuk selanjutnya diolah.

2.3. Data Collection Method

Data was mainly collected through direct interview with village's head or village's apparatus. Direct interview was also done with several institution's personals for certain data. Thus, further clarifications can be made by the enumerators to respondents during interview, while time consumed for data collection can be shortened.

The enumerator filled 2 (two) copies of questionnaires: one copy (blue questionnaire) will be the village's file and another copy (red questionnaire) is sent to BPS Kabupaten/Kota for further data processing.

2.4. Metode Pengolahan Data

Untuk mempercepat waktu penyelesaian serta dengan pertimbangan bahwa BPS Kabupaten/Kota lebih dekat ke sumber data, maka data entri kuesioner Podes 2008 dilakukan oleh staf di BPS Kabupaten/Kota. Sedangkan, Bagian Integrasi Pengolahan pada BPS bertugas mengembangkan sistem (aplikasi) pengolahan data yang memungkinkan bagi BPS Kabupaten/Kota untuk memproduksi tabel dan untuk melakukan validasi terhadap data mentah Podes 2008. Akhirnya, BPS melakukan kompilasi terhadap semua data mentah yang telah bebas kesalahan yang dikirimkan menggunakan sistem komunikasi data resmi oleh semua BPS Kabupaten/Kota.

2.4. Data Processing Method

In order to speed up the data processing and due to the fact that BPS Kabupaten/Kota is close to the data sources, hence, data entry of the questionnaires is done by staffs of BPS Kabupaten/Kota. Hence, Data Processing Division at BPS developed systems (application) of data processing that enables BPS Kabupaten/Kota to produce tables and to validate the raw data. Finally, BPS compiled the clean raw data which are sent through the official data communication system by all BPS Kabupaten/Kota
