PENJELASAN TEKNIS

TECHNICAL NOTES

1. Sumber utama data kependudukan adalah sensus penduduk yang dilaksanakan setiap sepuluh tahun sekali. Sensus penduduk telah dilaksanakan sebanyak enam kali sejak Indonesia merdeka, yaitu tahun 1961, 1971, 1980, 1990, 2000, dan 2010.

Di dalam sensus penduduk, pencacahan dilakukan terhadap seluruh penduduk yang berdomicili di wilayah teritorial Indonesia termasuk warga negara asing kecuali anggota korps diplomatik negara sahabat beserta keluarganya.

Metode pengumpulan data dalam sensus dilakukan dengan wawancara antara petugas sensus dengan responden dan juga melalui e-census. Pencatatan penduduk menggunakan konsep usual residence, yaitu konsep di mana penduduk biasa bertempat tinggal. Bagi penduduk yang bertempat tinggal tetap dicacah di mana mereka biasa tinggal, sedangkan untuk penduduk yang tidak bertempat tinggal tetap dicacah di tempat di mana mereka ditemukan petugas sensus pada malam 'Hari Sensus'. Termasuk penduduk yang tidak bertempat tinggal tetap adalah tuna wisma, awak kapal berbendera Indonesia, penghuni perahu/rumah apung, masyarakat terpencil/terasing, dan pengungsi. Bagi mereka yang mempunyai tempat tinggal tetap dan sedang bepergian ke luar wilayah lebih dari enam bulan, tidak dicacah di tempat tinggalnya, tetapi dicacah di tempat tujuannya. Untuk tahun yang tidak dilaksanakan sensus penduduk,

1. *The main source of demographic data is population census, which is conducted every ten years. Population Census has been conducted six times since Indonesia's independence: 1961, 1971, 1980, 1990, 2000, and 2010.*

The population census enumerates all residents who domicile in the entire territory of Indonesia including foreign citizens except the diplomatic corps members and their families.

The method of data collection in a population census involves interviewing respondents and conducting e-census. Enumeration of the population uses the concept of "usual residence", which is the concept of "places where people usually live". De jure was applied to the permanent residents, while de facto was applied to non-permanent residents. The permanent residents were enumerated in place where they normally live, the non-permanent residents were enumerated where they were found by the enumerators, on the night of 'Census Date'. The non permanent residents include homeless people, ship crew, boat people, remote area community, and internally displaced persons. Those who had permanent residence and had been travelling away from their home for six months or more were not enumerated in their permanent place, but in the place where they were during the census.

For the periods where the

PENJELASAN TEKNIS

1. Penghitungan statistik neraca nasional mengikuti buku petunjuk yang diterbitkan oleh Perserikatan Bangsa Bangsa (PBB) dikenal sebagai Sistem Neraca Nasional (SNN). SNN adalah rekomendasi internasional tentang bagaimana menyusun ukuran aktivitas ekonomi yang sesuai dengan standar neraca baku yang didasarkan pada prinsip-prinsip ekonomi. Rekomendasi yang dimaksud dinyatakan dalam sekumpulan konsep, definisi, klasifikasi, dan aturan neraca yang disepakati secara internasional dalam mengukur indikator tertentu seperti Produk Domestik Bruto (PDB). Salah satu bentuk adaptasi pencatatan statistik nasional adalah melakukan perubahan tahun dasar PDB Indonesia dari tahun 2000 ke 2010. Perubahan tahun dasar PDB dilakukan seiring dengan mengadopsi rekomendasi PBB yang tertuang dalam Sistem Neraca Nasional 2008 (SNA 2008).
2. TECHNICAL NOTES

1. *The method used to estimate national accounts statistics is based on the standard guidelines formed by United Nation known as System of National Accounts (SNA). SNA is the internationally agreed standard set of recommendations on how to compile measures of economic activity in accordance with strict accounting conventions based on economic principles. The recommendations are expressed in term of a set of concepts, definitions, classifications and accounting rules that comprise the internationally agreed standard for measuring indicators such as Gross Domestic Product (GDP). One of the improvement in the national statistical system is to rebase GDP form base year 2000 to 2010 in order to capture current economic condition. It is in line with the United Nations (UN) recommendation on 2008 SNA.*
2. *The basic measure of the value added arising from economic activity is known as Gross Domestic Product at the national level and Gross Regional Domestic Product (GRDP) at the regional level (provinces/regencies/municipalities). menyajikan komposisi data nilai tambah dirinci menurut sumber kegiatan ekonomi (lapangan usaha) dan menurut komponen penggunaannya. PDB maupun PDRB dari sisi lapangan usaha merupakan penjumlahan seluruh komponen nilai tambah bruto yang mampu diciptakan oleh sektor-sektor ekonomi atas berbagai aktivitas produksinya. Sedangkan dari sisi pengeluaran menjelaskan tentang penggunaan dari nilai tambah tersebut.

“expenditure approach”. The first approach is to measure value added produced by various kinds of economic activities, while the second approach is to measure final uses of the country’s output. In other words, GDP/GRDP is the summary of total value added produced by all economic industries (activities) and the way of using it.

Sehingga klasifikasi PDB menurut pengeluaran dirinci menjadi 7 komponen yaitu komponen pengeluaran konsumsi rumah tangga, pengeluaran konsumsi LNPRRT, pengeluaran konsumsi pemerintah, pembentukan modal tetap bruto, perubahan inventori, ekspor barang dan jasa, dan impor barang dan jasa.
