3.2 Fluktuasi Kurs Valuta Asing di Jawa Barat, 2014

Tahun 2014 merupakan tahun dari pesta demokrasi rakyat Indonesia sekaligus menjadi tahun yang cukup berat bagi pergerakan nilai tukar Rupiah. Dipengaruhi oleh kondisi ekonomi domestik yang fluktuatif serta gejolak politik yang terjadi di sepanjang tahun 2014 menjadi faktor dominan atas pergerakan nilai Rupiah.

Triwulan pertama tahun 2014, Rupiah mengalami apresiasi atau penguatan yang cukup baik meski masih menembus level psikologi 11.000 per Dollar AS. Tepatnya pada Maret 2014, data transaksi di Kota Bandung, Jawa Barat menunjukkan Rupiah ditutup pada posisi 11.416,56 sekaligus menjadi level terbaik penguatan Rupiah sepanjang tahun 2014. Menguatnya nilai Rupiah juga merupakan imbas dari menurunnya perekonomian Amerika, khususnya permasalahan angka pengangguran dan tingkat suku bunga. Konflik Ukraina dan Rusia serta fluktuasi ekonomi China yang kemudian menjadi barometer ekonomi Asia, turut andil dalam pergerakan nilai di sepanjang tahun 2014. Kondisi fluktuatif yang cukup tajam dialami Rupiah pada pertengahan tahun, terlebih di masa pemilihan umum berlangsung. Pelaku pasar cenderung berhati-hati dan melihat perkembangan kondisi pasca pemilu presiden.

3.2 Foreign Exchange Fluctuations in Jawa Barat, 2014

2014 becomes the year of the Indonesian people's Democratic Party, but at the same time be the year that is difficult for Rupiah exchange rate movements. Influenced by volatile domestic economic conditions and the political turmoil that occurred throughout the years 2014 become the dominant factor on the movement of the rupiah value.

The first quarter of 2014, rupiah appreciation is pretty good but still penetrates the psychological level of 11,000 per US Dollar. Precisely in March 2014, the transaction data in Bandung Jawa Barat showed that Rupiah was closed at 11,416.56 as well as a best level rupiah during the year of 2014. The strengthening of the rupiah is also the impact of the decline in US economic data, particularly the problems of unemployment and interest rates. Conflict of Ukraine and Russia as well as the fluctuations of Chinese economic data which later became the Asian economic barometer contribute to the fluctuation throughout the year 2014. This fluctuation is quite sharp condition passed by Rupiah in the middle year, especially when election is held. The marketers tend to be cautious and look at the development of the condition after the presidential election.

Rupiah bahkan sempat melemah hingga level 12.035 terhadap Dollar AS pada bulan Juni 2014 di perdagangan valuta asing Kota Bandung. Meski di bulan berikutnya Rupiah kembali terapresiasi atau menguat akibat hasil Pemilu yang sesuai dengan ekspektasi para pelaku pasar, namun hal tersebut tidak berjalan lama.

Rupiah selama enam bulan berturut-turut tercatat melemah hingga kembali menembus level 12.390,31 per Dollar AS sampai akhir Desember 2014 di Kota Bandung, Jawa Barat. Hal ini terjadi seiring dengan belum adanya perbaikan data ekonomi domestik yang mendukung penguatan Rupiah, harga minyak dunia yang terus menurun serta semakin membaiknya kondisi perekonomian Amerika di tiga bulan terakhir menyebabkan banyaknya pelaku pasar mengalihkan modalnya kembali pada Dollar AS.

Desember 2014 menjadi perhatian khusus atas melemahnya nilai Rupiah yang mengingatkan kita pada krisis moneter yang terjadi pada tahun 1999 dimana saat itu Rupiah menembus level psikologi 13.000 per Dollar AS. Di balik hal tersebut diharapkan memasuki tahun 2015 nilai Rupiah akan kembali menguat dan kestabilan kondisi politik ekonomi dapat tercipta.

Rupiah had even weakened to the level of 12,035 against the US Dollar in June 2014 in Kota Bandung foreign exchange trading. Although the amount is back to its position in the next month due to the results of the election which is in accordance with the expectations of market participants, but it did not last long.

Rupiah, for six consecutive months, is recorded in weak position back through the level of 12,390.31 per US Dollar at the end of December 2014 in Kota Bandung, Jawa Barat. Along with the lack of improvement of domestic economic data that support the strengthening of rupiah, world oil prices continue to decline and the improving condition of the US economy in three months led to many market participants shifted their capital back to the US Dollar.

In December 2014 becomes particular concern over the weakening of rupiah which is reminiscent of the 1999 financial crisis which hit a psychology 13,000 rupiah per US Dollar. Behind that matter, it is expected that in 2015, Rupiah will return the value of the rupiah strengthened political and economic stability conditions can be created.

Fundamental ekonomi Indonesia yang cenderung membaik disertai faktor politik yang mendukung di Maret 2014, membuat sentiment pasar dalam negeri kembali positif. Bank Indonesia yang masih konsisten menerapkan kebijakan ketatnya dengan suku bunga yang dipertahankan di level 7,5% mendukung perbaikan ekonomi domestik. Secara khusus kondisi politik yang tengah menghangat menjadi dorongan positif pasar dengan harapan bakal-bakal calon presiden yang akan memasuki pemilu nanti akan meningkatkan investasi dan penanaman modal asing di Indonesia.

Di sisi lain sentiment eksternal dari gejolak Ukraina-Rusia kembali memanas dan sempat menjadi isu penguatan nilai Rupiah terhadap Dollar AS. Pada penutupan minggu ke empat, Rupiah terdepresiasi akibat beberapa faktor eksternal diantaranya situasi ekonomi Asia yang kurang kondusif dengan pelemahan Yuan dan Yen yang dirilis di bawah estimasi pelaku pasar, serta dirilisnya data *non-farm payrolls* AS yang cukup positif sehingga menimbulkan apresiasi bagi Dollar AS. Hal ini dibuktikan dengan pelemahan nilai rupiah di minggu ke empat Maret 2014. Meskipun demikian, jika dibandingkan dengan penutupan bulan lalu, nilai Rupiah pada Maret 2014 menguat

3.2.4 Fluktuasi Kurs Valuta Asing di Jawa Barat, April 2014

Kondisi politik Indonesia khususnya Pemilu Legislatif pada 9 April 2014 dan dorongan surplus neraca perdagangan serta perlambatan inflasi menjadi faktor kunci pergerakan nilai tukar Rupiah terhadap mata uang asing khususnya Dollar AS. Namun beranjak ke minggu tiga hingga penutupan April 2014, nilai tukar Rupiah mengalami depresiasi yang cukup tajam hingga ditutup pada posisi 11.640,63. Hal ini lebih disebabkan oleh sentimen negatif pasar pasca berakhirnya Pemilu Legislatif dan kekhawatiran para investor atas perhitungan **quick count** calon presiden sehingga memunculkan banyaknya isu terhadap calon pasangan yang berkompetisi dan dirasakan akan mengancam arus investasi asing.

Di sisi lain faktor eksternal yang mempengaruhi pelemahan nilai tukar Rupiah adalah perbaikan kondisi ekonomi Amerika yang kian positif. Terlebih di akhir bulan ketika Federal Reserve kembali memutuskan pengurangan Quantitative Easing (QE) sebanyak USD \$10 milyar dan menurunnya tingkat pengangguran di Amerika ke level 6,3%. On the other hand, the external factors that affect the weakening of Rupiah is the improvement of American economy which is increasingly positive, especially at the end of the month when Federal Reserve has decided the reduction of Quantitative Easing (QE) as much as USD \$ 10 billion and the decline of US unemployment to the rate of 6.3%. Aliran modal masuk pada asset keuangan Rupiah di rentang waktu dua bulan terakhir, kurang memberikan efek positif yang berarti jika dibandingkan dengan tekanan yang ada. Tekanan yang dialami nilai Rupiah pada Mei 2014 lebih disebabkan oleh fundamental ekonomi domestik. Meningkatnya permintaan korporasi terhadap mata uang asing khususnya Dollar AS sesuai dengan pola musiman pembayaran utang luar negeri (ULN) dan *repatriasi deviden* menjadi faktor terkuat pelemahan Rupiah. Selain daripada hal itu, tekanan sedikit dipengaruhi oleh perilaku investor yang menunggu Pemilihan Umum Presiden pada beberapa bulan ke depan. Aksi tunggu atau *wait and see* dari pelaku pasar juga dipicu oleh faktor eksternal dengan ketidakpastian rencana *the Fed* menaikkan suku bunga.

Nilai tukar Rupiah menguat terhadap beberapa mata uang asing yang diperdagangkan di Kota Bandung, Jawa Barat diantaranya Dollar Australia yang menguat tipis 4,69 poin ke posisi 10.826,56. Capital inflows in the amount of financial assets in the span of two months are having less significant positive effect compared to the existing pressures. The pressures experienced by Rupiah in May 2014 are caused by domestic economic fundamentals. The increasing of corporate demand for foreign currencies, especially Dollar US according to the seasonal pattern of foreign debt payments (ULN) and repatriation of dividends is the strongest factor weakening Rupiah. Besides, the pressure is slightly influenced by the behavior of investors who await of presidential election in next few months. Action of wait and see from market participants are also triggered by external factors to the uncertainty regarding to the Fed plans to raise interest rates.

Rupiah strengthened against foreign currencies traded in Bandung Jawa Barat, including Australian Dollar which edged up at 4.69 points to the position of 10,826.56. 3.2.6 Fluktuasi Kurs Valuta Asing di Jawa Barat, Juni 2014

Amerika Serikat telah merilis data ekonomi yang berkenaan dengan ketenagakerjaan dan pengangguran yang kemudian direspon pasar dengan sentimen negatif dikarenakan rilis angka pengangguran mingguan di luar ekspektasi. Meski demikian hal tersebut belum mampu memberikan penguatan nilai Rupiah di Juni 2014.

Data yang kami catat di Jawa Bara khususnya Kota Bandung, menggambarkan dengan jelas pelemahan nilai Rupiah yang menembus level 12.035 pada akhir penutupan Juni 2014. Sebelumnya Rupiah sempat menguat di minggu ke dua yang mencapai 11.718,75 akibat rilis surplusnya neraca perdagangan nasional. Namun nilai terkoreksi dan mengalami depresiasi selama dua minggu berikutnya. Faktor utama hal ini terjadi lebih disebabkan oleh faktor ekonomi dan situasi politik nasional. Rendahnya harga komoditas yang menjadi andalan ekspor dan isu mengenai pengurangan BBM bersubsidi menjadi sentimen negatif pasar ditambah lagi dengan naiknya harga-harga kebutuhan pokok yang menjelang awal Ramadhan 1435 Hijriah bagi mayoritas muslim Indonesia kian melengkapi pelemahan nilai tukar Rupiah terhadap mata uang asing.

3.2.12 Fluktuasi Kurs Valuta Asing di Jawa Barat, Desember 2014

Nilai tukar Rupiah terus mendapatkan tekanan sehingga mengalami pelemahan terburuk di penghujung tahun 2014 ini. Di minggu ke tiga Desember 2014 Rupiah ditutup pada level 12.829,69 dan terkoreksi kembali pada minggu terakhir Desember 2014 hingga terapresiasi atau sedikit menguat dan ditutup pada level 12.390,31.

Sebagaimana yang kita ketahui bahwa nilai tukar Rupiah termasuk salah satu nilai tukar yang paling rentan terhadap kondisi ekonomi dunia dan Amerika khususnya, pelemahan ini terjadi karena penyesuaian nilai tukar terhadap Dollar AS yang terus menguat. Penguatan Dollar AS lebih disebabkan oleh data perekonomian Amerika yang kian positif. Perbaikan data ekonomi ini memberikan sinyal positif, *the Fed* siap untuk menaikkan suku bunga Dollar AS. Begitu pula dengan faktor harga minyak dunia yang terus turun akibat besarnya kuantitas produksi minyak dunia yang tidak berimbang dengan daya beli pasar. Hal tersebut memiliki dampak pada turunnya nilai ekspor komoditas Indonesia dan memberikan tekanan pada neraca perdagangan.

3.2.12 Foreign Exchange Fluctuations in Jawa Barat, December 2014

Rupiah continued to get pressure resulted to the worst weakening in the late 2014's. On the third week of December 2014, foreign exchange trading in Bandung city recorded its lowest point since 1999. In that third week December 2014, Rupiah is closed at 12,829.69 and re-corrected during the last week of December and finally appreciated and closed at 12,390, 31.

As we've known that the value of Rupiah exchange rate is one of the most vulnerable to global economic conditions and America in particular, this attenuation occurs due to the adjustment of exchange rate against US Dollar which continued to strengthen. The strengthening of US Dollar is caused by US economic data which are increasingly positive. The improvement process of economic data gives a positive signal the Fed is ready to raise interest rates of US Dollar. In addition, Dollar world oil prices continue to fall due to the high world oil production quantity which is unbalanced with market power. That gives an impact on the decline in the value of Indonesia's commodity exports and put pressure on the trade balance.

Depresiasi nilai Rupiah terhadap Dollar AS diikuti oleh melemahnya nilai Rupiah terhadap mata uang asing lainnya pada Desember 2014. Rata-rata pelemahan nilai Rupiah dibandingkan dengan penutupan bulan lalu November 2014 adalah sebesar 0,84%. Lemahnya nilai tukar Rupiah tersebut tercatat menjadi depresiasi Rupiah terburuk sepanjang tahun 2014 terhadap mata uang Dollar AS, Dollar Hongkong, Riyal Saudi Arabia, dan Bath Thailand. Sebaliknya, di Desember 2014 Rupiah mampu menguat 31,56 poin ke posisi 10.36,25 terhadap salah satu mata uang yaitu Dollar Australia dan tercatat sebagai penguatan terbaiknya di sepanjang tahun 2014.
