KATA PENGANTAR

PREFACE

Publikasi Statistik Industri tahun 2014 ini merupakan kelanjutan dari publikasi sebelumnya terkait sektor industri pengolahan. Data yang disajikan dalam penerbitan ini mencakup data industri pengolahan skala **besar** dan **sedang** keadaan tahun 2013. Jenis data yang disajikan tidak berbeda dengan penyajian tahun sebelumnya. Karakteristik yang dimunculkan di antaranya:

Banyaknya Perusahaan

Banyaknya Tenaga Kerja

Upah / Gaji

Nilai Output / Input

Nilai Tambah atas dasar harga pasar

Nilai Tambah atas dasar biaya faktor produksi

Pengelompokan industri dalam publikasi tahun 2014 ini menggunakan Klasifikasi Baku Lapangan Usaha Indonesia (KBLI) yang didasarkan pada *International Standard Industrial Classification of All Economic Activities* (ISIC) revisi 4 Tahun 2008. Klasifikasi ini mengelompokkan industri menjadi 21 Kategori (Alfabet), 88 Golongan Pokok (2 digit), 241 Golongan (3 digit), 512 Subgolongan (4 digit), dan 1435 Kelompok (5 digit).

Semoga publikasi hasil survei tahunan perusahaan industri besar dan sedang ini dapat lebih melengkapi informasi yang terkait dengan industri pengolahan.

*The 2014 Industrial Statistics publication is a continuation of the previous Large and Medium Manufacturing Industry publication. The data presented in this publication refer to the active **Large** and **Medium** manufacturing industries in 2013. The type of published are similar to those of last year editions. Major characteristics that collected is:*

Number of Establishments

Number of Workers

Wage / Salary

Output Value / Input Cost

Value Added at Market Prices

Value Added at Factor Cost

*The industry classification in this 2014 publication has used the Klasifikasifikasi Baku Lapangan Usaha Indonesia (KBLI) that adopted the fourth revision of the *International Standard Industrial Classification of All Economic Activities* (ISIC) 4th revision 2008. With this classification, the number of industries are expanded to 21 Category (Alphabet), 88 Principal Group (2 digits), 241 Group (3 digits), 512 Sub Group (4 digits), and 1435 Class.*

It is hoped that this publication of Large and Medium Manufacturing Survey presents more detailed information about manufacturing sector.

Akhirnya, pada kesempatan ini perkenankan kami mengucapkan terima kasih yang sebesar-besarnya kepada semua pihak, khususnya kepada para industriawan yang telah mengisi kuesioner dengan jawaban yang sebaik-baiknya sehingga survei ini berjalan dengan lancar.

Manado, September 2015
Kepala Badan Pusat Statistik
Provinsi Sulawesi Utara

Faizal Anwar

Finally, we would like to express our sincere gratitude to all parties, especially the industrialist, for their cooperation in making this survey successful.

*Manado, September 2015
BPS - Statistics North Sulawesi*

PENJELASAN UMUM

GENERAL REMARKS

I. PENDAHULUAN

Penyajian data hasil survei industri tahun 2014 ini berisi tabel-tabel agregat terkait jumlah perusahaan, status penanaman modal, jumlah tenaga kerja, pengeluaran untuk tenaga kerja, tenaga listrik, bahan bakar yang digunakan, biaya input, nilai output, nilai tambah, jual beli barang modal tetap, dan kapasitas mesin produksi.

II. RUANG LINGKUP

Perusahaan industri yang dicakup dalam survei ini adalah perusahaan industri besar dan sedang, yaitu perusahaan-perusahaan yang mempunyai tenaga kerja 20 orang atau lebih, termasuk perusahaan industri yang baru mulai berproduksi secara komersial pada tahun 2013.

III. KLASIFIKASI INDUSTRI

Klasifikasi industri yang digunakan dalam survei ini adalah klasifikasi yang didasarkan pada *International Standard Industrial Classification of All Economic Activities (ISIC)* revisi 4 Tahun 2008, yang telah disesuaikan dengan kondisi di Indonesia dengan nama

I. INTRODUCTION

The result of the 2014 industrial survey consists of aggregates data on the number of establishments, capital status, the number of persons engaged, labor cost, electricity, energy, intermediate inputs, output value, value added, value of transaction in fixed capital, and capacity of production machines.

II. COVERAGE

Establishments covered in this survey are large and medium manufacturing establishments, i.e. all establishments employing 20 workers or more, including establishments which started commercial production during 2013.

III. INDUSTRIAL CLASSIFICATION

The Industrial Classification adopted in this survey is the third revision of the International Standard Industrial Classification of All Economic Activities (ISIC) fourth revision 2008, that is modified according to the local conditions in Indonesia It is called the

KLASIFIKASI BAKU LAPANGAN USAHA INDONESIA (KBLI).

KBLI yang didasarkan pada ISIC revisi 4 Tahun 2008 berbeda dengan yang didasarkan pada ISIC revisi 3. KBLI sektor industri yang didasarkan pada ISIC revisi 3 mencakup 362 jenis industri. Sementara KBLI (ISIC revisi 4 Tahun 2008) yang digunakan pada publikasi ini terdapat 241 jenis industri meskipun tidak seluruh jenis industri ada perusahaannya. Kode yang digunakan berbeda dengan KBLI sebelumnya. Kode klasifikasi dimulai dari 10110 sampai dengan 33151.

KBLI suatu perusahaan ditentukan berdasarkan produksi utamanya, yaitu jenis komoditi yang dihasilkan dengan nilai paling besar. Apabila suatu perusahaan industri menghasilkan 2 jenis komoditi atau lebih dengan nilai yang sama maka produksi utama adalah komoditi yang dihasilkan dengan kuantitas terbesar.

IV. METODE PENGUMPULAN DATA

Pelaksanaan survei industri dilakukan dengan cara memberikan daftar pertanyaan kepada semua perusahaan industri yang tergolong besar dan sedang dan tercatat dalam direktori Badan Pusat Statistik (BPS). Hal ini memberikan penjelasan bahwa pencacahan dalam survei ini dilakukan secara lengkap.

KLASIFIKASI BAKU LAPANGAN USAHA INDONESIA or KBLI).

KBLI based on the fourth revision 2008 of ISIC is different from the third revision. KBLI based on the second revision of ISIC includes 362 manufacturing sub-groups. Whereas, KBLI (based on the fourth revision 2008 of ISIC) used in this publication includes 241 manufacturing sub-groups although not all manufacturing sub-groups consist of establishment. The code number of the new ISIC is different with the old one. The code numbers of the classification start from 10110 to 33151.

The main product of an establishment determines the KBLI to which the establishment corresponds. This is defined as the product with the highest output value (in rupiah) of all item, manufactured by the establishment. If an establishment produces two or more products with the same value, the main product is that which has the highest quantity.

IV. METHOD OF DATA COLLECTION

This manufacturing survey was conducted by delivering questionnaires to all large and medium manufacturing establishments recorded in the directory compiled by the Central Bureau of Statistics (CBS). This gives an explanation that this survey is conducted by applying completed enumeration approach.

V. KONSEP DAN DEFINISI

Industri pengolahan adalah suatu kegiatan ekonomi yang mengubah suatu barang dasar secara mekanis, kimia atau dengan tangan menjadi barang jadi atau setengah jadi dan atau barang yang kurang nilainya menjadi barang yang lebih tinggi nilainya, serta sifatnya lebih dekat kepada pemakai akhir. Termasuk dalam kegiatan ini adalah kegiatan jasa industri dan pekerjaan perakitan (*assembling*).

Jasa industri adalah kegiatan industri yang melayani keperluan pihak lain. Pada kegiatan ini, bahan baku disediakan oleh pihak lain sedangkan pihak pengolah hanya melakukan pengolahannya dengan mendapat imbalan sejumlah uang atau barang sebagai balas jasa (upah makloom), misalnya perusahaan penggilingan padi yang melakukan kegiatan menggiling padi/gabah petani dengan balas jasa diperhitungkan secara hasil bagi.

Perusahaan atau usaha industri adalah suatu unit (kesatuan) usaha yang melakukan kegiatan ekonomi, bertujuan menghasilkan barang atau jasa, terletak pada suatu bangunan atau lokasi tertentu, dan mempunyai catatan administrasi tersendiri mengenai produksi dan struktur biaya serta ada seorang atau lebih yang bertanggung jawab atas usaha tersebut.

Perusahaan industri pengolahan dibagi 4 (empat) golongan. Penggolongan sektor industri pengolahan ini semata-mata hanya

V. *CONCEPTS and DEFINITIONS*

Manufacturing is defined as an economic activity engaged in processing materials and transforming them mechanically, chemically, or by hands, into finished or semi finished products and/or converting them into other goods having higher value and closer to the final user. This activity includes establishments engaged in industrial services an assembling.

Industrial services is industrial activities that serve others. In these activities, materials are supplied by others, while the industrial service establishments process and obtain payments from those activities as compensations. For example, a rice milling unit processes paddy which are owned by farmers, and then the processes earn some compensation by getting paid for processing the paddy.

Manufacturing establishments is defined as a production unit engaging in economic activity, produces goods or services, located in building or in certain location, maintains a business record concerning production and cost structure, and has one person or more that bear the responsibility for those activities.

Manufacturing industry sector is classified into four categories. This classification is based the number of persons engaged and is not based on the use of machinery, as well as the number of assets owned by a particular establishments.

didasarkan kepada banyaknya tenaga kerja yang bekerja di perusahaan tersebut tanpa memperhatikan apakah perusahaan itu menggunakan mesin tenaga kerja atau tidak, serta tanpa memperhatikan besarnya modal perusahaan itu.

Penggolongan Industri Pengolahan

| Golongan | Banyaknya Tenaga Kerja |
|--------------|------------------------|
| Besar | 100 orang atau lebih |
| Sedang | Antara 20 - 99 orang |
| Kecil | Antara 5 - 19 orang |
| Rumah Tangga | Antara 1 - 4 orang |

VI. METODE ESTIMASI

Pemasukan dokumen pada Survei Tahunan Perusahaan Industri Besar dan Sedang untuk diolah belum pernah mencapai 100 persen. Pada survei industri tahun 2014 ini pemasukan dokumen adalah sebesar 86,21 persen. Untuk mengetahui gambaran menyeluruh terhadap industri besar sedang yang ada, perlu dilakukan estimasi terhadap perusahaan-perusahaan industri yang tidak masuk dokumennya (non respon).

Secara umum ada 2 kategori perusahaan non respon, yaitu perusahaan lama yang non respon dan perusahaan baru yang non

Classification of Manufacturing

| <i>Classification</i> | <i>Number of Person Engaged</i> |
|-----------------------|---------------------------------|
| <i>Large</i> | <i>100 or more</i> |
| <i>Medium</i> | <i>From 20 - 99</i> |
| <i>Small</i> | <i>From 5 - 19</i> |
| <i>Household</i> | <i>From 1 - 4</i> |

VI. ESTIMATION METHOD

It is not practical to expect that the response rate to such a survey can be 100 percent. The response rate to the 2014 survey was 86,21 percent. Therefore, in order to have the complete figure covering all large and medium manufacturing establishment, estimation for non response establishment was necessary.

Two types of non response establishment exist. The old and the new non response establishment. The first includes establishments which responded in the previous year but did not respond this current year. The second, the new respondent

respon. Perusahaan lama non respon artinya perusahaan yang data tahun sebelumnya sudah ada tetapi non respon pada tahun ini. Sedangkan perusahaan baru non respon adalah perusahaan yang baru disurvei tahun ini (tahun 2014) dan nama serta alamatnya telah diperoleh, tetapi non respon.

Metode estimasi untuk kelompok perusahaan ini dilakukan dengan cara menggerakkan seluruh variabel tahun sebelumnya melalui pertumbuhan (*growth*) yang terjadi dalam masing-masing variabel dari perusahaan yang sesuai (*match*) menurut klasifikasi KBLI 5 digit. Pengertian match di sini adalah kode identitas perusahaan dan produksi utamanya sama.

Sedangkan estimasi perusahaan baru non respon dilakukan dengan cara *imputasi* data dari perusahaan lain yang “tenaga kerjanya” sama atau hampir sama, dalam KBLI 5 digit dan wilayahnya sama atau terdekat.

establishment includes establishment listed in the current year for the first time which did not respond.

Estimation for old non respondent is calculated by moving all variables of the last year data using the growth of every variables of the matched establishment in its 5 digit ISIC. “Matched establishment” means that identity codes of same establishment and their main products are both exactly the same.

Whereas, estimation for new-respondents is calculated by imputing data from other establishments that employ the same (or almost the same) number of workers in the same 5 digit ISIC and the nearest or same location.

ULASAN SINGKAT

SUMMARY

Pembangunan industri diamanatkan secara tegas dalam GBHN yang ditujukan dalam rangka memperluas kesempatan kerja, pemerataan kesempatan berusaha, meningkatkan ekspor, menunjang pembangunan daerah, memanfaatkan sumber daya alam, energi, dan sumber daya manusia. Sejalan dengan ini, pemerintah memberikan kesempatan yang seluas-luasnya kepada masyarakat untuk membuka berbagai kegiatan dalam bidang industri.

Di Indonesia, industrialisasi telah mengakibatkan transformasi struktural. Kontribusi sektor primer (pertanian) cenderung mengalami penurunan sementara kontribusi sektor sekunder (salah satunya sektor industri) dan tersier cenderung mengalami peningkatan.

Pola pertumbuhan ekonomi secara sektoral di Provinsi Sulawesi Utara agaknya sejalan dengan kecenderungan proses transformasi struktural yang terjadi di Indonesia meskipun hingga saat ini kontribusi sektor industri dalam menyumbangkan Produk Domestik Regional Bruto (PDRB) masih lebih rendah daripada sektor pertanian. Hal ini diindikasikan dengan adanya fakta bahwa sektor industri cenderung tumbuh lebih cepat dibandingkan dengan

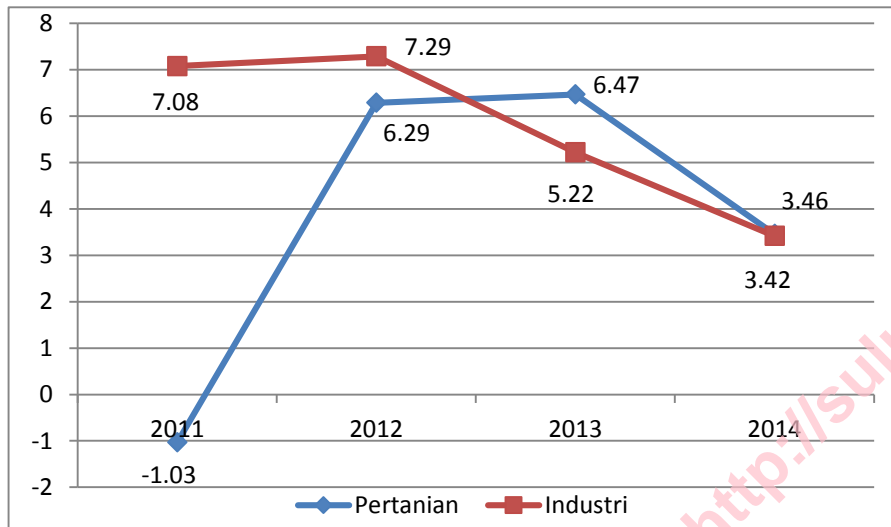

Industrial development is expressly mandated in the Guidelines are addressed in order to expand employment opportunities, equal opportunities, increase exports, support of local development, natural resources, energy, and human resources. In line with this, the government provides the widest opportunity for people to open up various activities in the field of industry.

In Indonesia, industrialization has resulted in structural transformation. The contribution of primary sector (agriculture) tended to decrease while the contribution of secondary sector (one of the industrial sector) and tertiary tend to increase.

Sectoral pattern of economic growth in North Sulawesi province seems in line with the trend of structural transformation process that occurs in Indonesia although until now the contribution of industrial sector in the Gross Regional Domestic Product donate (GRDP) is still lower than the agricultural sector. This is indicated by the fact that the industrial sector tends to grow faster than the agricultural sector. The growth in agriculture and industry

sektor pertanian. Pertumbuhan sektor pertanian dan industri disajikan pada Gambar 1 berikut.

Gambar 1. Pertumbuhan Sektor Pertanian dan Industri di Sulawesi Utara Tahun 2011 - 2014 (dalam Persen)

Pertumbuhan PDRB di sektor pertanian dari tahun 2011 sampai dengan 2014 nilainya cenderung berfluktuatif dari tahun ke tahun. Walaupun pada tahun 2011 mengalami pertumbuhan -1,03 persen, tetapi pada tahun 2013 meningkat tajam menjadi 6,47 persen dan tahun 2014 turun lagi menjadi 3,46 persen. Sementara, sektor industri tumbuh sebesar 7,08 persen pada tahun 2011 dan pertumbuhannya cenderung melambat hingga menjadi 3,42 persen di tahun 2014.

are presented in Figure 1 below.

Figure 1. Growth of Agriculture and Industry Sector in North Sulawesi Year 2011 – 2014 (In Percent)

GRDP growth of the agricultural sector from 2011 to 2014 the value tends to fluctuate from year to year. Although it had declined from -1.03 percent in 2011, but in 2013 rose sharply to 6.47 percent and declined to 4.12 percent in 2014. Meanwhile, the industrial sector grew by 7.08 percent in 2011 and growth is likely to slow to be 3.42 percent in 2014

Gambar 2. Kontribusi Sektor Pertanian dan Industri di Sulawesi Utara Tahun 2009 - 2014 (dalam Persen)

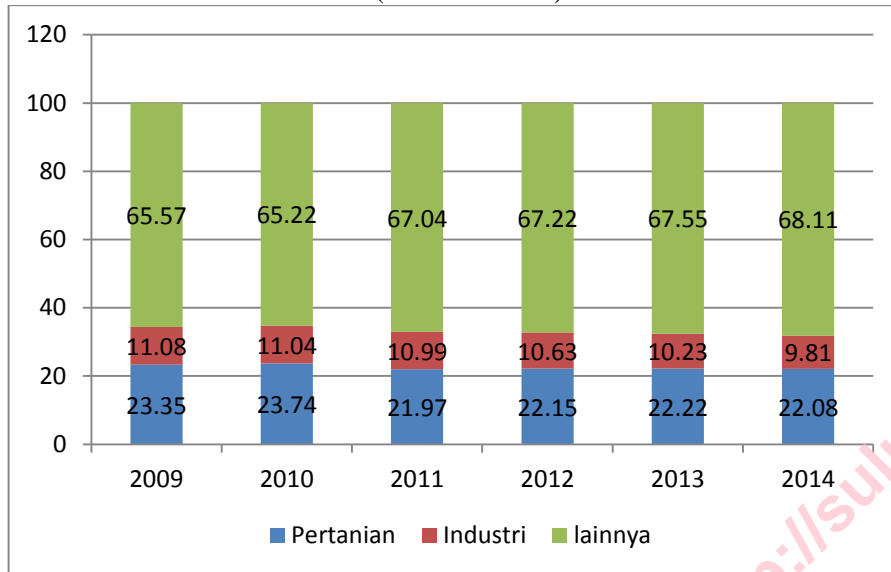

Figure 2. Contribution of Agricultural and Industrial Sector in North Sulawesi Year 2009 – 2014 (In Percent)

Pada tahun 2009, sektor industri memberikan kontribusi sebesar 11,08 persen dalam menyumbang besarnya PDRB di Sulawesi Utara. Kontribusi yang disumbangkan relatif lebih tinggi dibandingkan pada tahun 2013 dan 2014 yakni berturut-turut sebesar 10,23 persen dan 9,81 persen.

In 2009, the industrial sector contributed 11.08 percent in contributing to the GRDP in North Sulawesi. Contributions of donated relatively higher than in 2013 and 2014 which respectively amounted to 10.23 percent and 9.81 percent.

Pada tahun 2014 tercatat sebanyak 86 perusahaan industri besar dan sedang yang aktif di Provinsi Sulawesi Utara. Komposisi jumlah perusahaan menurut kode klasifikasi industri pada tahun 2014 menunjukkan bahwa perusahaan yang bergerak dalam Industri Makanan tercatat paling banyak di Provinsi Sulawesi Utara yakni 61 perusahaan (70,93 persen). Terbanyak kedua adalah Jasa Reparasi dan Pemasangan Mesin dan Peralatan sebanyak 5 perusahaan (5,81 persen). Serta Industri Minuman dan Industri Barang galian Bukan Logam masing-masing sebanyak 4 perusahaan (9,30 persen).

In 2014 there were 86 large and medium industrial companies active in the province of North Sulawesi. The composition of the number of establishments by industry classification code in 2014 shows that companies engaged in foods industry the most widely recorded in the province of North Sulawesi, namely 61 companies (70.93 percent). The second largest is the Repair services and installation of machinery and equipment as many as 5 companies (5.81 percent). And then, beverages and Others non-metallic mineral products companies each one 4 companies (9.30 percent).

Gambar 3. Banyaknya Perusahaan Industri Besar dan Sedang Menurut Jenis Industri di Sulawesi Utara Tahun 2014

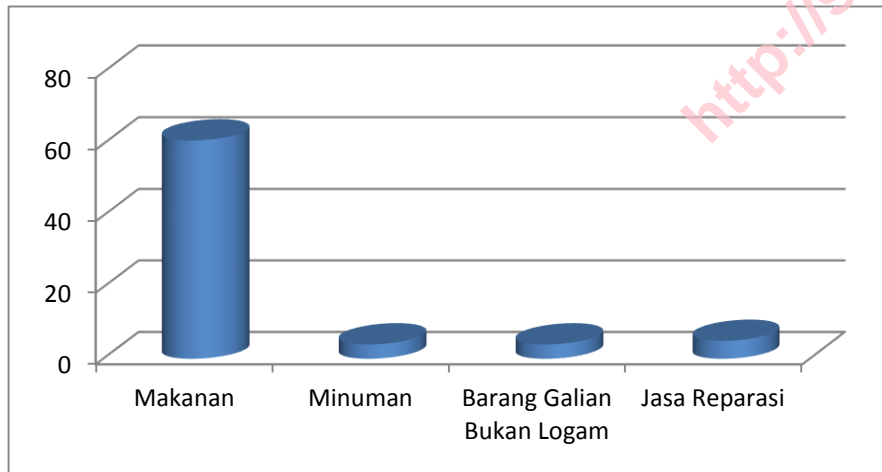

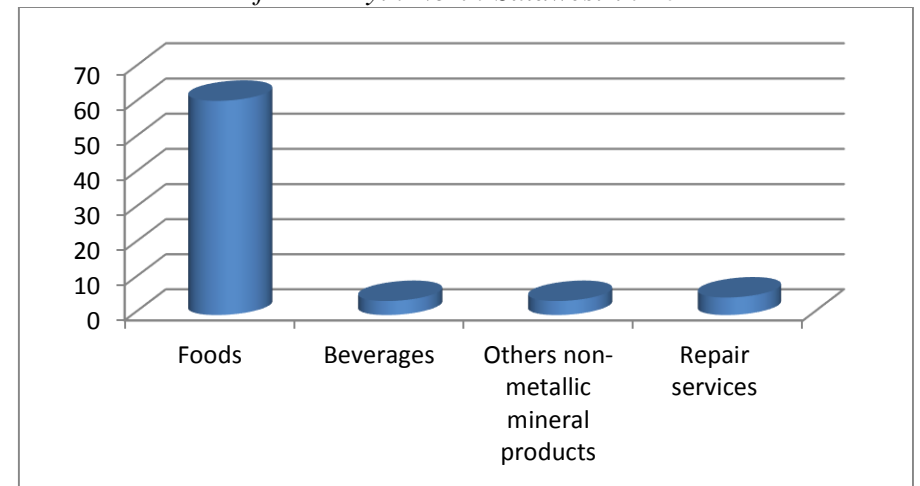

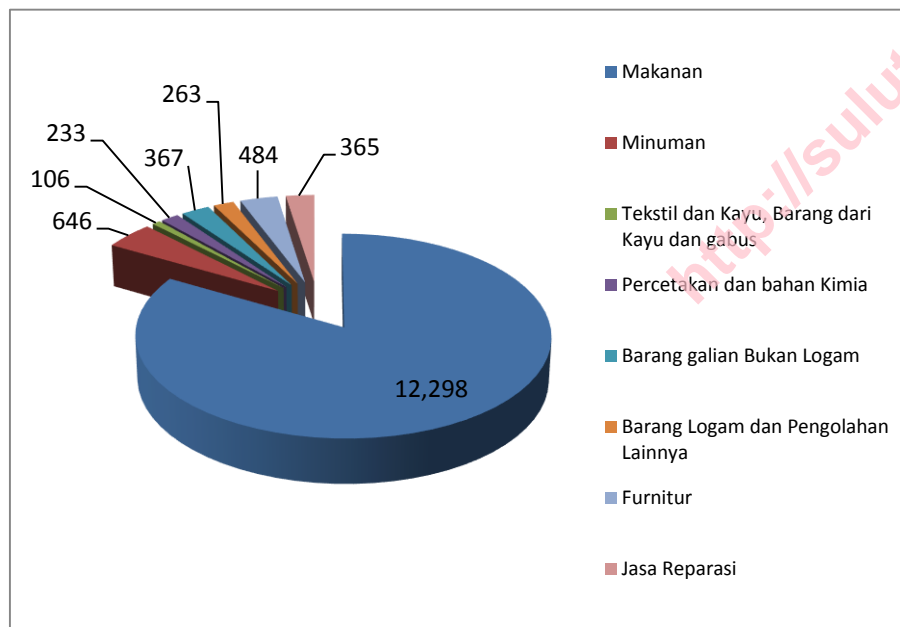

Figure 3. Number of Large and Medium By Type of Industry in North Sulawesi in 2014

Berdasarkan hasil Survei Tahunan Perusahaan Industri Besar dan Sedang tahun 2014, industri besar dan sedang mampu menyerap sebanyak 14.762 tenaga kerja. Industri makanan berperan paling besar dalam penyerapan tenaga kerja yaitu sebanyak 12.298 orang (83.30 persen) dari total tenaga kerja yang terserap di sektor industri besar dan sedang (Lihat Gambar 4).

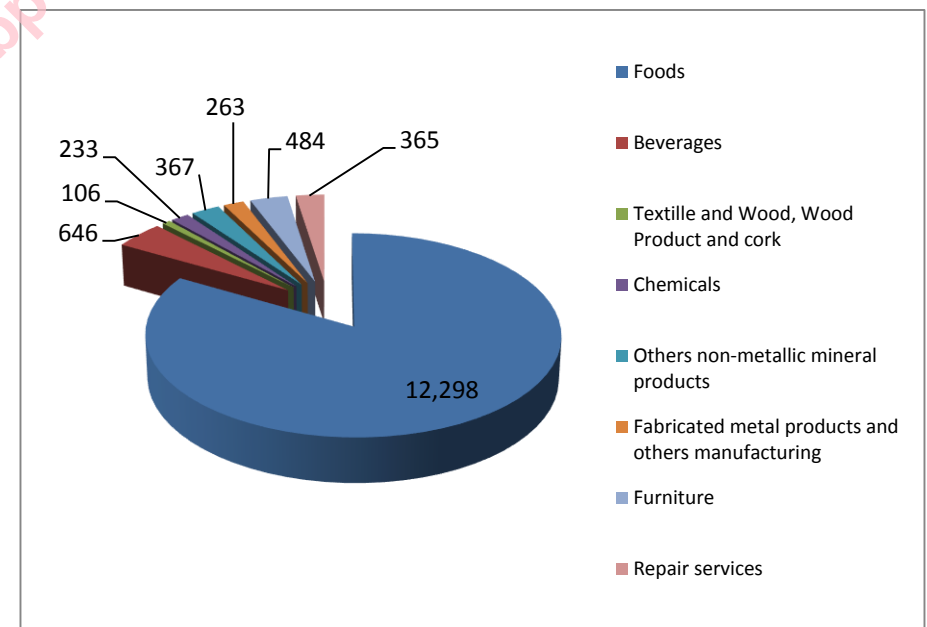

Gambar 4. Banyaknya Tenaga Kerja Industri Besar dan Sedang Menurut Jenis Industri di Sulawesi Utara Tahun 2014

Besarnya penyerapan tenaga kerja sebanding dengan banyaknya perusahaan yang bergerak pada jenis industri tersebut.

Based on the results of the Annual Survey of Large and Medium in 2014, large and medium manufacturing capable of absorbing as many as 14.762 workers. Foods industries contribute the most in the employment of as many as 12.298 people (83.30 percent) of total workers absorbed in large and medium manufacturing sector (See Figure 4).

Figure 4. Number of Person Engaged in Large and Medium By Type of Industry in North Sulawesi in 2014

The amount of labor absorption is proportional to the number of companies engaged in the type of industry.

Lebih lanjut, penyumbang terbesar nilai tambah (atas biaya faktor produksi) industri besar dan sedang pada tahun 2014 adalah industri makanan (KBLI 10) yakni sebesar 85,15 persen. Urutan kedua dan ketiga penyumbang nilai tambah terbesar adalah gabungan antara Industri Barang Logam, Bukan Mesin dan Peralatannya dan Industri Pengolahan Lainnya (KLBI 25 dan 32) dan industri Minuman (KBLI 11) berturut turut sebesar 4,8 persen dan 4,13 persen.

Furthermore, the largest contributor to the value added (at factor cost) of large and medium manufacturing in 2014 is foods industry (KBLI 10) which is equal to 85.15 percent. Second and third contributor to the value added is combine of Fabricated metal products and others manufacturing (KLBI 25 and 30) and Beverages (KBLI 11) consecutive at 4.8 percent and 4.13 percent.

Gambar 5. Nilai Tambah (biaya faktor) Industri Besar dan Sedang Menurut Jenis Industri di Sulawesi Utara Tahun 2014

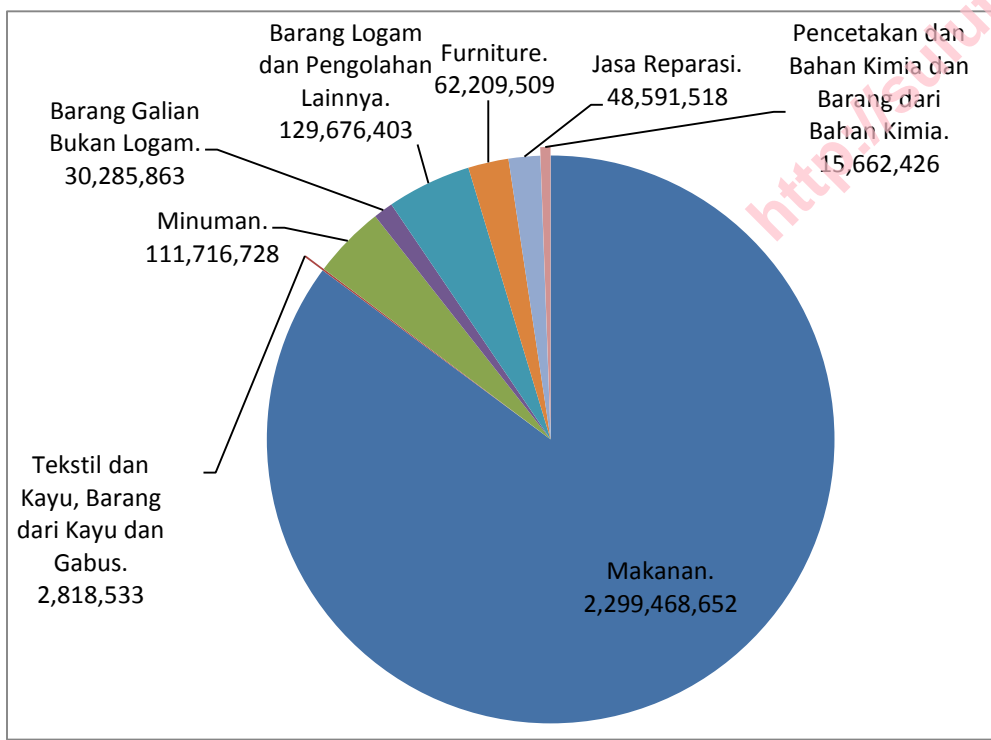

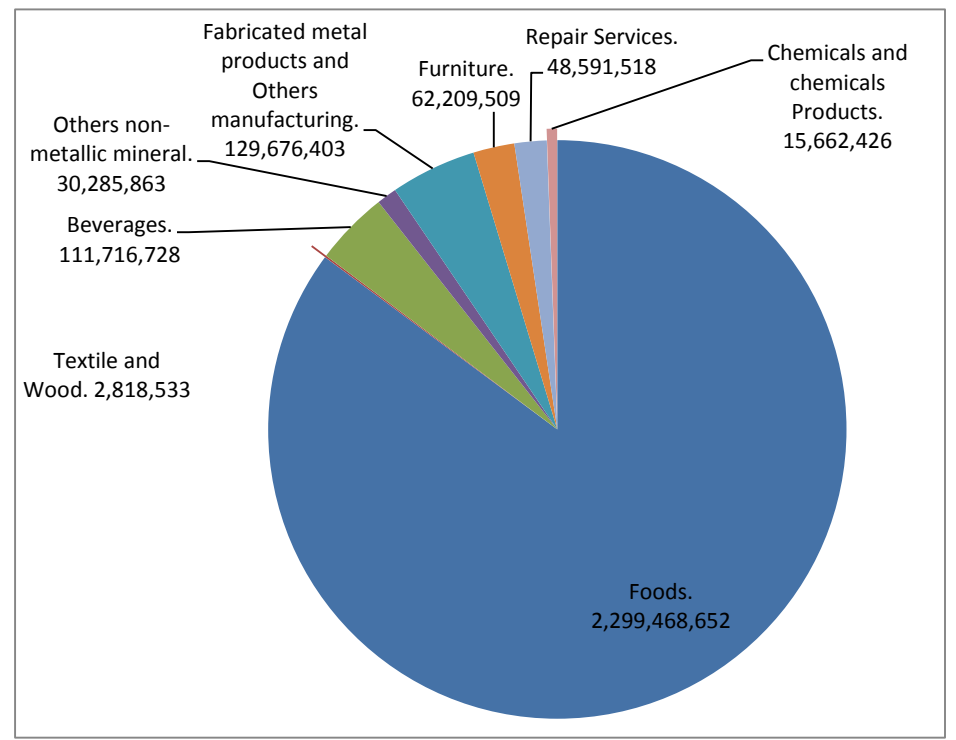

Figure 5. Value Added (at factor cost) in Large and Medium By Type of Industry in North Sulawesi in 2014
